NUMBER 18.

## NOTABLE NEWS EVENTS IN PICTURES

**DEFENSE CAKE**—There's no flour or butter in this "defense cake" concocted by Mrs. Lou Harris of Fort Worth, Texas, with recipe costing 30 cents.

**JEROME (the Great Diz') Dean**, ex-star pitcher of the National League, has relinquished his job as coach with the Chicago Cubs for a new role as St. Louis radio sports announcer.

**ROYAL QUINTUPLETS**—Princess, six-year-old lioness at California lion farm, was indeed proud when she recently gave birth to second batch of quintuplets within nine months. Heirs to the jungle throne are seen in a variety of poses.

**DESIGNED** for double duty on dark night or in a blackout, this black and white transparent coat features buttons made of reflectors to make wearer instantly visible.

**IL DUCE'S SHIP ILL-FATED**—Another link in Il Duce's merchant marine slips into oblivion as Italian supply ship goes down to Davey Jones' locker in the Mediterranean after successful assault by R. A. F. plane. Crew had already taken to the lifeboats.

**JANUARY IN AUGUST**—Summer below and winter in the snow-capped mountains of Colorado find lovely Erna Lovelady (left) and Mary Chapman all set for either occasion as they engage in a bit of skiing in the shadow of Pike's Peak while garbed in bathing suits for climate "down under."

**NEW 40-MM. ANTI-AIRCRAFT GUN**—First U. S.-built 40-mm. mobile anti-aircraft cannon is surveyed by officials at Akron, Ohio, where it was delivered to U.S. Army.

**WHAT A THRILL!**—One in a million is the adventure of student pilot Victor Woodrick (above), who fell from a plane in mid-air during a flight at Bellville, Ill., but luckily landed astride the plane's tail.

**TANK TRAPPED**—Russian tank, trapped by German shellfire, lies disabled in the middle of the road as Nazi cavalrymen advance through unidentified sector in invasion of Russia. One of first original photos to come out of the Red war zone.

## BRITISH AND RUSSIAN PLANES IN BIG RAID

British and Russian bombing planes with escorting fighter ships blasted Berlin last night in what was said to have been the most destructive raid ever carried out on the German capital.

If the German statement can be relied upon the air battle must have been tremendous. The Germans said they had shot down 54 allied planes in the last 24 hours.

According to the British version of the attack the Russians and the Royal Air Force took turn about in raiding the German Capital. Nine other points of vital importance to Germany were bombed said the report.

Destruction was severe in Berlin as well as other points.

France has a Dictator. He is Admiral Darlan, hater of the British and Pro-German. The British government charged that Darlan has been made dictator of France. When on yesterday Marshal Petain proclaimed the end of the French Republic the natural sequence was a Dictator. No comment was forthcoming from Vichy. In Washington there was only sporadic comment.

The President has not been heard from in 4 days.

London said it was ridiculous that any meeting was being arranged between Churchill and Roosevelt. Washington said it was impossible.

Still reports persisted. It was the first time in the history of the Republic that a President had been A. W. O. L. for four days. No word from the Presidential Yacht.

Washington was still talking about the photo finish in the House race on the draft extension bill. By a majority of one America's army is to be retained. Nothing has happened in recent months to more clearly indicate public apathy than this vote in the House.

In the far east a Japanese Naval spokesman said the time is at hand and the hour has struck when Japan is to act. The crisis will soon come, he said. A Japanese radio report said that the entire Japanese fleet is at Saigon ready for action.

There was no elaboration on the situation. All indications are that Japan will move within the next few hours or days at the outside. Whether she will move on Siberia remained a question. All informed quarters said Japan would move south, strike at Thailand first, then Singapore and of course the Dutch East Indies.

Stoppage of oil shipments to Japan by the United States government was believed certain to have caused immediate plans for seizure of the Indies.

Secretary of State Sumner Wells said it was a menace to America.

Britain has again warned Japan that a move on Thailand will be war on Britain.

London was leaving far eastern action to the United States. What the United States will do is not indicated. The only departure would be mass production of protests.

This much is a certainty. Japan will strike and strike soon. The United States must fight or get out.

## Gives Formula for Cotton Insect War

Calcium Arsenate and Lead Arsenate are the only poisons which will control the boll worm. No substitute poisons should be used for the control of boll worms.

Calcium arsenate is the recommended poison, but in case this poison cannot be bought, Lead Arsenate can be substituted. When lead arsenate is used, put 10 per cent lime with it as a carrier, and use 3 pounds per acre.

For poisoning of leaf worms, and calcium arsenate is not used, Paris Green can be substituted. Use as follows: 1 part Paris Green, 1 part flour, 5 parts lime. Use this mixture at the rate of 8 pounds per acre.

White Arsenic should not be used under any condition, as this poison is very deadly and will burn cotton.

J. W. Stufflebume, Jr.,  
County Agent.

## MISCELLANEOUS SHOWER

Mrs. Earl Bailey honored Mrs. Earl McFarland, the former Miss Helen Richards, with a shower at her home on Monday night at 8 o'clock.

Prize games were played and the prizes presented to the bride. A buffet dinner was served to the following: Juanita and Mary Beth Price, Juanita Whitaker, Josephine Richards, Earldine and Boots Bailey, Mrs. Jake Richards, Mrs. Grady Gill and Mrs. C. G. Moore.

Mr. and Mrs. Ourn Sapp of Rosebud visited in Cameron Saturday on business.

## NOTICE OF SHERIFF'S SALE OF REAL ESTATE

NOTICE IS HEREBY GIVEN That by virtue of an order of sale issued by the Clerk of the District Courts of Dallas County, Texas, on the 10th day of July, 1941, in a certain cause wherein Bankers Life Company, a corporation, is plaintiff, and Myrtle A. McNeely, a widow, and R. C. Shiplett are defendants, No. 55965-B, and wherein plaintiff recovered judgment against the defendant Myrtle A. McNeely for the sum of \$11,156.17, with interest thereon from June 9, 1941, at the rate of 10% per annum, and all costs of suit, which judgment was rendered on June 9, 1941, in the District Court of Dallas County, for the 44th Judicial District, I have levied upon and will, on the first Tuesday in September, 1941, same being the 2nd day of said month, at the Court House in the City of Cameron, Milam County, Texas, between the hours of ten o'clock a. m. and four o'clock p. m., proceed to sell to the highest bidder for cash all the right, title and interest of said defendants, or either of them, in and to the following described real estate, levied upon on August 5th, 1941, as the property of said defendants, to-wit:

Situated in the County of Milam, State of Texas, being 199 acres of land, a part of the Jose David Sanchez Six League Grant, Abstract No. 55, and being located three miles East of Rogers, Texas, and fifteen miles West of Cameron, Texas, generally known as the Myrtle A. McNeely Farm, and being the same land fully described in two tracts in a deed of trust from Myrtle A. McNeely, a widow, to G. W. Fowler, Trustee, dated January 1, 1936, and recorded in Volume 76, Page 307, of the Deed of Trust Records of Milam County, Texas.

The above sale will be made by me to satisfy the above described judgment, and the proceeds thereof will be applied to the satisfaction of said judgment.

V. T. WHITE,  
Sheriff of Milam County, Texas.  
By LeRoy Massengale, Deputy.

Mrs. J. F. Howard, Mrs. Randolph Williamson and son Randy, Mrs. Robinson, and Mrs. W. S. Brewer are visiting Mr. and Mrs. Ernest Howard in Waco Wednesday whose daughter, Becky Ann, is celebrating her 8th birthday.

## COTTON CROP YET TO BE MADE IN COUNTY

A survey on the eve of the cotton crop harvest shows that the crop may become valuable, depending on what the young cotton produces within the next few weeks.

Thus far the county has suffered little insect damage but there are indications of boll and leaf worm.

Early cotton is now matured and opening. The average would seem to be around one-third of a bale. In the bottoms the crop is good but much of the land was never planted due to continued wet weather.

Cameron has ginned her first bale. The crop will begin to move within the next ten days. Upland cotton will give a fair yield. The price will be about double that of last year, at least 18c basis.

## Rotarians Establish Student Loan Fund

A step forward for the club was taken by Cameron Rotarians Wednesday when they voted to establish a student loan fund.

No program was given for the day and the recommendation of the Board of Directors was taken to the membership.

Time will be required for the fund but it is contemplated that within three to five years money will be helpful to deserving students.

## GOES TO PRISON

Jose Galarza who escaped jail here on the night of December 31, 1940, was given four years in State prison for burglary Wednesday morning.

He was arrested in Mexia by Sheriff White and returned to jail here where he had been indicted.

He was tried before the court and will be taken to prison soon.

Mrs. Frank Spura and son Ernest, have returned to their home in Oklahoma City after a three weeks visit with Mrs. Spura's sister, Mrs. Ed Schiller of Yarrington. Mrs. Spura was formerly Emma Horak of Cameron.

E. L. McGuire of Rockdale was a Cameron business visitor Saturday.

## REDS SAY HITLER IS STOPPED IN THE EAST

Bombing planes of the Soviet air force struck at Berlin Thursday night.

It was the first indication that Germany had misstated the facts concerning the Soviet air force. The Germans said the Red air force had been knocked from the skies.

Several years before the war was launched by Germany the Reds were reported to have had the largest air force in the world, even greater than the Nazi.

While the damage to the German capital was said to have been slight there was no mistaking the effect of the centuries on the Eastern Front. The announcement came from London in a statement denying that British planes had been over the capital.

The British news broadcast said the planes were those of Soviet Russia. It is the first Red air raid on German soil.

The Germans claimed Friday that a new offensive has been launched and that the Red army is doomed. Russia countered with the statement that their armies are holding everywhere and even counter attacking.

The confusion was all that could

## Stanton Dossett Visits In Cameron

Stanton Dossett of Shreveport, La., was in Cameron Monday on a short visit in the home of his brother in law Stanley Swift. He left shortly after noon for his home.

Mr. Dossett owns a crate factory and other interests in Shreveport. He is also interested in the Cameron Compress and was formerly its manager. When he left Cameron several years ago he was associated with Mrs. Mamie Hefley in fire insurance.

## FOOD TASTES BETTER

*Cooked in an*  
**ELECTRIC ROASTER**

Food cooked in an Electric Roaster tastes better. It is richer in flavor... retains its healthful, energizing qualities. The roomy oven of the electric roaster cooks a complete meal—a meat and two vegetables, while you spend the afternoon with your family... or while you visit or shop.

*Cooler... More Convenient*  
**ECONOMICAL, TOO**

Your kitchen is cooler... your kitchen chores are lighter. The modern roaster is automatic, using only the amount of electricity needed for cooking... and your cheap TP&L Electric Service makes it surprisingly economical to use!

The Texas Power & Light Company places behind our National Defense Program the full measure of its resources. This Company is already meeting the power needs of national defense in the area it serves, and is ready with ample reserve power to supply the needs of expanding industries as well as the normal requirements of its customers.

**TEXAS POWER & LIGHT COMPANY**

**... now I'm ace-high in clubs!**

A while back, at my club, I was nothing but a fourth at bridge. Another fellow to fill up a pool. Then came the momentous day when the conversation turned to beer. While the lads made claims and counter-claims, I maintained a sphinx-like silence. Not until my opinion was asked did I signal for a round of Grand Prize for the crowd.

One by one they tasted this grand-tastin' beer. A sip, a smile. Hurrahs galore then greeted my ears. In a matter of seconds, I became the man of the hour and Grand Prize, the new favorite of the club.

Now that I'm ace-high in the outfit, I give due credit to this fact—a man's first taste of Grand Prize tells him it's one of America's truly great beers. So, next time be sure the brand you buy is Grand Prize. It's your guarantee of grand-tastin' refreshment.

Gulf Brewing Co., Houston

**for MODERN living**

In the early days, medicine show quacks sold crude oil for a dollar a bottle as a cure for all human ills. Today hundreds of essentials for modern living are made from oil. It supplies heat for the home. It provides power for the Nation's machinery and transportation. It lubricates the gears of industry. It furnishes fuel for your car. It has shortened distances to make our Nation one big community.

America is safer today because of petroleum. The oilman's initiative and enterprise have made available to the United States the world's largest supply of petroleum.

In all this, Texas plays a leading part. Last year we supplied 36 per cent of all the Nation's oil, and now have over half of the Nation's oil reserves.

You and every American live more comfortably and safely today because of Texas petroleum.

# Texas-Grown Cotton Once Sold for 3c a Pound

By AVIS PLATTER

Edgewood, Texas.

(Copyright, 1941, by the Southwest Magazine Co.)

MRS. IDA SMITH, Texas pioneer woman, was born near Fairfield, Freestone county, Texas, in 1854. When I asked Mrs. Smith for an interview and to tell me some of her pioneer experience she said:

"I wonder if anyone cares to know about my pioneer experience? This is a fast-moving age we live in and people are too busy to read much, at least they think they are too busy."

"We pioneers had a few books to read—and we read all of them—but we had no newspapers, no magazines and no best sellers to read. I see books now on shelves in homes—good books—that are never read. Seems strange that any good book in any home would go unread."

"I was just 6 years of age when father, whose name was Abner Choat, packed his family and their belongings in a wagon pulled by oxen and moved from Freestone to Kaufman county, Texas."

"He homesteaded 100 acres of land near Ables Springs, a small community in Kaufman county. There was no lumber yard within a hundred miles of Ables Springs, so building a home out of pine lumber was unthinkable. But a little thing like that did not dismay father. He shouldered his ax, went out into the forest and cut down trees, cut the trees into logs of proper length and built us a comfortable 2-room cabin. He also built two stick-and-mud chimneys, one for each room. The roof was of boards rived from red oak trees. The floors were puncheon (split logs turned split side up). The windows were split boards, not frame glass windows like we have today. I was almost a grown girl before our home had glass windows."

## Cotton Sold for 3c a Pound

"Father had to grub out some of the land, but he soon made it tillable. We

raised cotton, corn, peas, sweet potatoes, sorghum and some garden vegetables. We made syrup from the sorghum and also vinegar from the cane juice. The syrup mill, made of wood, was powered by horses or oxen that went round and round. Our principal cash crop was cotton. When Garfield was President cotton sold for 8 to 11 cents a pound; when Cleveland was President it sold for 3 to 5 cents a pound."

"I was 6 years of age when War Between the States was declared. Father enlisted and fought for the South. Pioneering had been hard enough, but the war made it harder. I was too young to work in the fields. Nevertheless I worked. I helped to keep house and helped to cook."

"While struggling to overcome the pinch of war, mother found out that the title to our 100 acres was worthless. She was obliged to buy this land or lose it. She bought it for \$5 an acre."

"I went to school at Weaver Cemetery. The log school house was three miles from our home and the school term five months. I went four months one year and three months another year, all the schooling I ever got. We studied McGuffey's readers, Webster Blue Back Speller and Davies arithmetic. I had to quit school when mother's eyes became infected and do the housework."

## Girls Knitted Their Own Hose

"Grandmother lived with us and was very old. She carded rolls which I spun into thread and wove into cloth. Folks made their own clothes, bed-linens, bed-spreads, blankets and rugs. They also knitted socks and gloves. We girls had to knit our own hose. Imagine a girl today having to knit her own hose."

"Modern day girls have face powders to match their complexions, puffs and perfumes on dressers all ready to be used. Pioneer girls used starch or a

light dusting of flour and meal to take the shine off their faces. A piece of woolen cloth, a mole skin, or a piece of sheep-skin with wool left on were used for powder puffs. As for perfume, we had none. Any substitute for perfume smelled too loud. We kept bags of rose petals and spices among our clothes to give them a sweet odor."

"Our recreation—when we had time for it—was square dancing. We danced every week. None of us knew how to waltz or do any of the fancy steps of today. Later, when the waltz was first introduced, many parents would not let their daughters waltz. They looked upon it as indecent. All weddings, holidays and special occasions were celebrated with dancing. Everybody danced—married and single. We could see no harm in dancing the way we danced."

## Everybody Rode Horseback

"Everybody rode horseback. That was the only kind of transportation we had except wagons drawn by horses and oxen. Folks were too poor to own buggies. Once in a while a stranger from the East would come to the community riding in a buggy. That was real news and created a sensation."

"People were proud of their riding horses and took good care of them. A good-looking horse gave one social distinction. Your horse and how well you kept him groomed and fed was a fair index to your character."

"Circuit-riding preachers came to our community once a month. They preached in the school house, since we had no church building. These preachers were sincere men, always ready and willing to speak words of comfort, sing gospel songs and pray with the people any where at any time. Rev. Catwood, Methodist, and Rev. Pope, Baptist, were our two circuit-riding preachers. We also had two Sunday School classes—one for children and one for grown-ups."

"When I met, fell in love with and married R. P. Pennyfield. My wedding dress was made of white Swiss, ribbon and lace. It looked lovely to me—all ruffled and fluffy—in the style of the times."

"Mr. Pennyfield bought 100 acres of land in the timber, paying \$3 an acre for it. He built on the land a log house of one main room and one side room with puncheon floors. That was our first home, a crude home if compared to homes of today, but we lived there happily. You don't need a fine house to make you happy. The 100 acres were fenced with rails split from red oak logs and our garden patch was fenced with pickets also split from logs. I was proud of that little picket fence; it kept the chickens out of my garden."

## Cooked Meals on Fireplace

"I cooked on the fireplace until I had two children, then we bought a cooking stove. Cooking on a fireplace, though inconvenient, is not so bad in winter but in summer it overheats the face and hands. The best food we ever ate was cooked this way in pots and ovens—far better than any food cooked on a stove."

"There were no rural mail boxes. We had to go miles to a postoffice to get mail. Many a time I have ridden horseback to the postoffice with one of my children riding behind me and the other one riding in front, sitting on my lap."

"Pioneer people chilled a lot. Sometimes the chill would come once a day, or once every other day, or once every third day. Then there were chills every seventh day. The common type and the hardest to get rid of were third day chills. All chills were accompanied by fever and some by high fever. To lower high fevers horse radish tea was given patients to make them sweat, followed by bathing face and hands in cold water or a cold sponge bath all over the body."

## Favorite Spring Tonic

"A favorite spring tonic given to purify the blood were doses of vinegar in which rusty nails had been soaked. This was supposed to put more iron into

## Taxes Took a Fifth of the National Income

Taxes took one-fifth of the national income of this country in the last fiscal year, according to the Census Bureau. The largest share went to city and county governments. Total collections of all Federal, State, and local governments were approximately \$24,300,000,000 for the year. This was \$109 per capita, of which Uncle Sam received \$29; State government \$27, and local governments the remaining \$43. Tax collections were at the rate of \$410 per family."

—PAGE 2—

the blood. Because of lack of fruits and vegetables in winter our diets were deficient in iron. We had not yet learned to put up fruits and vegetables in jars and cans."

"Doctors were few and I can remember some families who lived ten miles from the nearest doctor. He was sent for only when there was serious illness. A doctor usually rode horseback when calling on patients and carried his medicines in a saddle-bag."

"Almost every community had one or two women who were experienced in nursing and who could apply simple remedies to patients, such as poultices made of corn meal, salt, horse radish roots, cotton seed, mustard seed mashed with a hammer and other remedies external and internal. Whisky was given when temperature ran low as in pneumonia. We had no hot water bags and for a substitute would fill bottles with hot water, cork them tight and apply to patient. Rocks were also heat-

help. They would do the nursing, cooking, washing, ironing or anything else needed to be done. No charge was ever made for such service. It was a labor of love."

## Broom-Sage Brooms

"I wonder what the modern housewife would do if she had no broom made of broom straw or no vacuum cleaner. We pioneer women had neither, yet we got along very well without them. Broom-sage grew almost everywhere. It was higher than a man's head. We gathered it, stripped the bottom leaves and stems from the stalks, tied the stalks into a bundle and there was your broom, a perfectly good one, that swept as clean as any broom sweeps today."

"Candles are now used as ornaments in a pretty holder. I remember when they were a household necessity for giving light. Saturday afternoons were set aside for candle-moulding. That was the biggest job sister and I had. We could hardly mould enough candles to last through the coming week. We made them out of melted beef tallow."

"My first husband died and I married Mr. Smith in 1887. We had six children, three girls and three boys. Nine of my ten children are still living. I have grandchildren and great-grandchildren. My life has been full of work and blessings and I am happy."

Mrs. Smith lives with her son, Claude, in Terrell, Texas. She enjoys good health for her 87 years, and keeps up with the times. She reads newspapers, magazines and worthwhile books. She has no time for trashy literature or for silly sob stories that are told over the radio."

"Riding in a buggy was real news and created a sensation."

ed, wrapped in cloth, and applied in same manner."

"When there was sickness in a family neighbors came from far and near to

## Nazi Army Invades Russia

By EDWIN L. JAMES

(The New York Times)

THE German Army has launched a powerful drive against the stubborn Russian Army. The initial surprise attack of the Nazis netted them large gains up to July 30th. The invaders have driven the Soviet forces out of most of Bessarabia, out of former Polish territory held by the Russians and out of the Baltic States taken over by Moscow last year. Now the new drive is intended by Hitler to take his forces to Moscow.

Each side claims that the other has lost millions in killed and wounded. These estimates cannot be verified, but

as his objective. Anything less than that would be reckoned as a Hitler defeat."

The rather brilliant performances of the Russians in the first five weeks of the campaign may justify speculation on the time element in the campaign, which is important. It may be said roughly that after September 15, whatever happens between now and then, the difficulties of the invading army will increase. Over most of Russia-in-Europe there is a rainy season the last half of September, which precedes the coming of heavy winter which would become a factor as early as November. The German forces are so largely me-

WAR IS THEIR BURDEN—Three of the Soviet leaders upon whose shoulders fall the major burdens of current war are pictured recently in Russian capital. (Left to right), V. M. Molotov, Commissar of Foreign Affairs; Premier J. V. Stalin and K. E. Voroshilov, Marshal of Red Army.

there is desperate fighting on many fronts by 9,000,000 men and losses, eventually, are bound to be appalling. It is impossible to get the true facts of this war because both sides send out conflicting reports. There is no doubt that the Germans have inflicted heavy losses in men, airplanes and tanks on the Russians. There is small doubt that the Russians have cost the Germans heavily. Yet, in this largest battle in history, there is no good reason to believe that Hitler's army has been as yet seriously crippled. The ability of the Russians to put up what has been unquestionably a better defense than the Germans expected indicates that the morale of the Red forces has not been broken."

## The Price of Gains

While it is to be expected that the drive will net the Germans much territory, it may prove that relatively it will cost them more heavily in the long run. Japan captured the principal cities and rail points in China, yet so far has failed to win the war."

Hitler cannot win a really decisive victory unless he destroys the Red Armies. He has definitely fixed that

chanized that roads form a very important place in their campaign. There are some good paved roads in Western Russia, but not enough of them for German purposes. In many regions the Nazis are obliged to use dirt roads which will become very difficult indeed in September. In other words, if the Russian Army holds for one more month, even if forced to retreat, the German Army will find many troubles from then on through the winter."

## Obstacles in the Path

As has been said, the element of distance is of relatively less importance in the Russian campaign than in other drives Hitler has made. True enough, the Stalin Line is important, and if the Germans can crumble it they will have inflicted a heavy blow on their enemies. Yet, on the other hand, distances in Russia are very great and if a Russian army could be found one month from now fighting the Germans even several hundred miles farther into Russia, the difficulties of the invaders would be greatly increased by the mere circumstances of the lengthening of their lines (Continued on Page 5, column 3)

## Romantic Caddo Lake

AROLYN RAMSEY writes entertainingly in the New York Times about Caddo Lake, the largest fresh water lake in Texas. She says in part:

"Sprawling for sixty-five miles across East Texas and North Louisiana, Caddo is half lake, half river. Through a maze of twisting bayous and tortuous sloughs, its amber waters wind slowly by cypress-grown shores. In its biggest part—Broad Lake, which is twenty miles long and five miles wide—huge cypress brakes stand like tiny forests in the shallow water. Its cypress-lined bayous, brakes and inlets, its broad waters, its winding channels make it unlike any other lake in the world."

"The largest State park in Texas is here, covering 35,000 of Caddo's 150,000 acres. Spacious and attractive camping cottages are centered in the park. Sportsmen's lodges and commercial fishing camps are cut out of the primitive shores of the lake in about thirty wide areas. At the camps the fisherman can get complete equipment for a day's or a week's fishing."

## Guides Essential

"Guides are essential because even those sportsmen who are most familiar with this fantastically formed lake are afraid to trust themselves among the myriad twisting bayous, sloughs and smaller lakes where one cypress brake looks exactly like the next. The guides are local negroes and as picturesque a crew as will be found anywhere in the world. These negroes are following in the steps of their fathers, through whom the lore and legend of Caddo have been handed down. Their knowledge of the lake's intricacies is uncanny. They can follow the hidden boat roads in the blackest night; they know the fishing signs by instinct—where and why and how the fish are biting."

"Natives of Caddo, white and black, are as distinct a group in their way as Kentucky mountaineers or Big Bend cowboys. Only in the most recent years have hard-surfaced roads made the lake accessible to the public, and 'civilization' still has not reached whole sections of the Big Lake."

"On Broad Lake the natives get their mail from boxes nailed to cypress trees; it is delivered daily by a postman who drives his boat over a fifty-mile route."

"These people are good story tellers. They can spin you yarns by the hour. But none of the tall tales will be as thrilling and as gripping as the plain

facts of Caddo's history."

## Born in Mystery

"The lake was born in mystery. There are legends of the Caddo Indians being warned by the Great Spirit to withdraw from the flat lands and prepare for an earthquake and flood—which came, and formed the lake. There is a theory that the lake was formed on a dark night in 1811 when earthquakes shook the whole South, the Mississippi river changed its course and Reelfoot Lake in Tennessee came into being. Yet this is denied by old records which show that in 1536 Cabeza de Vaca, the Spanish explorer, and his band of Indians sighted the lake's waters and named it Laguna Espanola."

"The lake played an exciting part in the opening up of Texas and the Southwest. In the Eighteen Sixties this lake formed the chief port of entry to Central and West Texas. Scores of white-

Boating along Big Cypress Bayou on Caddo Lake.

decked river packets chugged up Big Cypress Bayou, through the heart of Caddo, from New Orleans—bringing new settlers and manufactured goods to the bustling, booming town of Jefferson, Texas."

## "Queen of the West"

"Known to the pioneers of five States as 'Queen of the West,' Jefferson had a population of 30,000 when Dallas was only a trading post. Cotton planters, cattle barons and farmers from Louisiana, Arkansas, Oklahoma and Texas brought their goods to the long rows of docks at Jefferson and waited for the steamboats to carry them to New Orleans."

"These boom days were over for Caddo when a channel was cut through the Big Raft, a natural log jam which stretched intermittently for 100 miles below Shreveport. Removal of the log jam caused the deep waters to flow out of the channel of Big Cypress Bayou. Then the wharves at Jefferson burned down. Steamboats could no longer get through. Caddo's glamorous days were over."

## Raid on Saboteurs

RECENTLY the United States counter-espionage staged a raid that had no equal since first World War days. Thirty-three alleged spies, including three women, were arrested by agents of the Federal Bureau of Investigation, which has been keeping check on saboteurs and fifth columnists ever since defense became the country's chief concern. Almost all the seizures were made on the same evenings in places as far apart as the New York waterfront and a Wisconsin factory. Those arrested were held for prosecution under the World War espionage statute.

The Federal Bureau of Investigation asserted that it had been on the trail of the suspects for two years. Twenty-six of the thirty-three were said to be of German nationality, the remainder being American, French, Russian and South African. Some of the ring, it was alleged, acted as couriers, bearing funds from belligerent countries and transferring information from this country. Members stationed in New York City, according to the Federal men, worked in defense industries, including plants making tanks, planes and the American "secret" bomb sight. They used short-wave radio and invisible inks, had a restaurant rendezvous in Manhattan, New York, posed in a variety of occupations from soda dispenser to notary public.

## 4-H Membership Enrollment

4-H club enrollment for 1940 shows an increase over that of the previous year, the U. S. Department of Agriculture reports. The report, by M. L. Wilson, director of the Federal Extension Service, shows 1,420,297 boys and girls listed as members of 79,721 clubs. Greatest membership gains are reported in the Southern States. Alabama again leading with a membership of 115,193. Texas is second, with 88,091 members, and Georgia third with 82,962 boys and girls enrolled.

## \$10,000,000 in Cash Donated to Britain

Winthrop Aldrich, president of the British War Relief Society, 730 Fifth Avenue, New York City, announced that it had received from Americans more than \$10,000,000 in cash contributions and donations in kind, consisting mostly of clothing, valued at \$2,000,000. Exclusive of cash sent to Britain, the society is said to have shipped 35,794 cases of clothing and other supplies overseas up to May 31, 1941. Cash remittances, purchased supplies, knitted goods and bandages sent to England up to June 1 accounted for more than \$7,000,000. On July 1 the society reported \$1,900,000 in cash on hand, against which there are commitments of more than \$1,000,000.

The report reveals the scope of the society's activities, covering a wide range of civilian needs. Approximately \$1,250,000 has been spent for 700

mobile feeding kitchens, their stocking and maintenance—to serve civilians in bombed cities.

The American Ambulance, Great Britain, which is solely supported by the society, has received \$207,000. It has 300 units that have traveled 1,300,000 miles and handled more than 75,000 cases.

## Retail Food Store Sales Up 10%

Retail food store sales for the first six months of 1941 were approximately 10 per cent greater than for the corresponding period of 1940, according to a survey by Progressive Grocer, New York City.

The increase amounted to \$545,000,000 divided as follows: Independent grocery and combination stores, \$233,000,000; chain grocery and combination stores, \$207,000,000; specialty stores including meat markets, bakeries, fruit and vegetable markets, confectionery stores and milk dealers, \$105,000,000.

## Democracy at Work

One of the most effective public relations jobs that has ever come to our attention is the advertising of a corporation which told the public how advancement is made from the ranks in its organization and reported that its president had started with it as a millwright helper, its executive vice president as a stock chaser and its plant manager and general superintendent both as tool makers. The same sort of thing could be said about nine out of ten corporation executives in this country. And it should be said—loud and often. For it is the final answer to all subversionists who would destroy the present order on the ground of its unfairness to the worker.

Democracy is well worth the effort that is needed to make its beneficiaries appreciate their luck. Publicity of this sort not only builds a world of prestige for the advertiser, it is a most valuable form of national service—Plate-Makers' Criterion.

## Russian Oil Fields

The principal oil-producing area in Russia is at Baku on the Caspian Sea just south of the Caucasus mountains, in extreme Southern Russia. Also, there is a substantial oil production at Grozy, just north of these mountains, and in recent years some production has been developed in the Ural mountains. However, it is estimated that at least 75 per cent of the estimated 625,000 barrels daily of oil that Russia is producing come from the Baku field, where the country's refining center also is situated.

The Baku field is probably the richest oil area in the world. By 1920, when the field was nationalized by the Soviet Union, production had mounted to 500,000 barrels an acre, a yield far greater than in any other field known to date. Production at that time was coming from fourteen to eighteen different

sands. To reach the first oil sand, a hole one meter square was dug, while wells to the deeper horizons running up to 5,000 feet were drilled in the usual manner.

With the German Army striking deep into Russia, attention is focused on the vast oil resources of the Soviet Union and their need in the present military operations, as well as their probable role in the future development of Europe.

That Russian oil was one of the determining factors in the decision of the German government to send its army into Russia is the general belief. Hitler is reported short of lubricants. He has synthetic gasoline plants that produce the major supply of his gasoline but good lubricating oil cannot be made from synthetic gasoline.

## Poe's "Tamerlane"

A fragile book of forty small pages, published in 1827, under the title of "Tamerlane," was given to the New York Public Library a few weeks ago. Its owner had paid \$17,500 for it.

Edgar Allen Poe, author of "The Raven," wrote the poems in "Tamerlane" at the age of 16. This 1827 edition of forty pages is not only Poe's first published poems, but his first published work of any kind. As such it is one of the most sought after items by rare book collectors. There are only eleven known copies in existence. Several years ago one of these eleven copies sold for \$31,000.

The printer of "Tamerlane" was Calvin F. S. Thomas who in 1827 owned a small job printing shop in Boston. The edition is carelessly printed, sprinkled with mistakes, and the cover and title page are surrounded by an ornamental border that any printer of today would throw in the "hell-box." At the time the book was published Poe was having a hard time. Debts and poverty assailed him through most of his life. "Tamerlane" was a poor seller and there is doubt that Thomas ever got a nickel for printing it. Poe has fame now, but there is an ironic turn in the fact that a small copy of his first published poems, which he probably would have sold for as little as 50 cents, recently sold for \$17,500.

## Plans to Teach Thrift

The government through the various defense organizations is just now beginning to attempt to teach thrift to a nation which has been notoriously prodigal in the use of products. Posters will be issued on the proper care of tires and the conservation of oil and gasoline. Radio manufacturers and dealers will start campaigns to inform the consumer on how to keep sets in good condition. Auto manufacturers, dealers and repair services will urge more frequent check of cars and give information on how to prolong their life. Everything possible will be done to minimize the inconveniences which will be caused as production of consumer goods dwindles.

ped with rods. I know a superstitious man who carries a possum foot in his pocket to ward off lightning. He says the foot must come from an albino possum with pink eyes. A possum foot, it seems to me, is pretty slim protection against lightning's striking power. Scientists say you have one chance in 339,000 of being struck by lightning. If they are right the odds seem safe enough, but I wouldn't bet \$339,000 against \$1 that lightning would never strike me. The best way to escape a lightning bolt about to come toward you is to start dodging 10 minutes before it strikes and pray while you are dodging.

The defense program has requisitioned metal but not wood. That is front page news. I can think of nothing more useful than wood. We could not get along without it. Through all the centuries it has been man's best friend—sheltering and warming and bearing his burdens. Even the lowly sawdust, a by-product of wood, plays a big part in our economy. From sawdust is made rubbing alcohol, turpentine, resin, rayon, plastic, insecticides, etc. At one time sawdust was trodden under foot, had no value except to spread on floors. Still another use to which sawdust has been put is as a filler for cheap dolls. That has given it sentimental value. What is sweeter than a little girl going into rapture over the gift of a doll.

"Nearly one fourth of the 2,639 automobile and truck accidents in Dallas since January 1st occur because drivers won't yield the right of way," said Lieutenant Flay Nelson, chief traffic officer of the police department. Drivers who hog the right of way will be with us always. No amount of warning or advice will do them any good. They go through life hell-bent and woe be to any driver who gets in their way. Hence it is better to be patient and yield the right of way to these street and road hogs. Patience is a virtue and a life-saver when you get behind an auto wheel these dangerous days.

## Must Build Character

Federal District Judge William H. Atwell, of Dallas, delivered an Independence Day address before the Dallas Salesmanship Club. Part of his address follows:

"We speak of total defense. We call attention to the fact that we are building ships and planes and guns. We seriously ask, is this enough? Can America have total defense unless she builds character? Unless she has spirit? Unless her men and women are willing to sacrifice? Are we building men? Men who pull together? Do we think we can bring about prosperity by discouraging thrift? That we can strengthen the weak by weakening the strong? That we can help small men by tearing down big men? That we can lift the wage-earner by pulling down the wage-payer? That we can win battles with class hatred?"

"Our Congress cannot vote character. Dollars won't buy it. It is our job to build it. It has been built here before. The plans for its building are not obsolete. They are as good today as they were when they were first tried."

"It was the people at the Alamo, at San Jacinto, at Bunker Hill, at Concord, at Valley Forge, at Appomattox after Gettysburg. It was the people who crossed the mountains, bridged the rivers, reclaimed the prairies and forests. It was the people who carved the States and solidified a nation. They are the people who built America and they didn't do it with billions of dollars appropriated by Congress. They did it with character."

## Lack of Specialists Disappointing to Army

The War Department has not obtained as many specialists from the ranks of selectees as it had expected. There is a shortage of skilled men in sixty-seven categories, including truck drivers, cooks and radio operators.

The shortages range from a fraction of 1 per cent to more than 24 per cent. Leading shortages are truck drivers, 6.5 per cent; automobile mechanics, 14.6; cooks, 24.8, and commercial radio operators, 15.3.

The department expects that in a majority of cases men can be trained in the Army to fill the gaps.

## Gasoline Made Solid By Addition of Soap

Liquid gasoline may be converted into a solid fuel with soap, according to patent No. 2,246,552 awarded to Eugene D. Stirlen of New Haven Conn.

The soap is said to congeal the gasoline, making it safer to burn. The patent is silent as to the use of the solid gasoline in internal combustion engines. It is claimed, however, to be safer to handle, since it remains solid even while burning. Should the burner in which it is being used as a fuel turn over, there would be no fluid to run and spread the flames.

In producing the solid gasoline, just sufficient soap is added to dissolve in the liquid and cause it to congeal. Next a solvent like alcohol is added to bring both the gasoline and soap into solution. The mixture is then distilled to drive off the solvent and to solidify the gasoline-soap mixture. About 6.2 per cent of soap remains in the solid gasoline.

## Cotton

"King Cotton" is having to go to work at some very humble tasks, but experts say there's a promising future for him. Mounting cotton surpluses are posing an acute problem and every effort is being made to find new domestic uses for the staple. One of the most promising—and surprising—prospects is in housing.

United States Housing Authority reports that in many of its low-cost housing projects it is now using nearly a full bale of cotton in every home.

"The King" is finding useful employment all the way from cellar to roof-tree. Webs of cotton are felted into a base fabric and impregnated with asphalt to become an excellent roofing material. Coated with a bituminous mixture or with an electrolytic deposit of copper, cotton serves for flashing around eaves and sills. Cotton muslin provides a fine wall surface over plywood or plaster. In its almost natural form, cotton can be used in thick batts for wall and ceiling insulation. It can be chemically treated so as to be fireproof, water repel-

lent, resistant to decay and unattractive to vermin. Its thermal resistance approaches or equals that of other insulating "wools."

In less obvious forms cotton finds many other uses. It is woven into window cords and electrical insulation. Reduced to cellulose it becomes the basis for many plastics—electrical tubing and kitchen and bathroom fixtures. As a cellulose nitrate it makes flooring material. It is also the basis of synthetic resins now used for lacquers, paints and varnishes.

## Army Is Short of War Efficiency

The United States Army today—after a year of expansion and preparation—is still months away from adequate combat efficiency.

In the opinion of most high-ranking officers not a single division is yet ready for war, although all our organized divisions are already superior in training to the divisions we sent to France in 1917.

Only in the physical condition of our soldiers, already hardened to field service and capable of extended effort, considerable endurance and twenty-five-mile marches, can the condition of the Army be considered satisfactory. There are grave deficiencies in equipment, in training and tactics and leadership and to a lesser extent in discipline and morale.

Military lack of vision is freely criticized within the Army itself and some officers say that the only hope of progress is to sweep the Army clean of the "Colonel Blimps" and military reactionaries who, in the past, have blocked and who still are blocking tactical progress. Incompetent officers of all grades, but especially general officers and colonels, must be weeded out, it is held, if we are to have a battle-worthy army.

## Drive for Aluminum

Mayor La Guardia, Federal Director of Civilian Defense, has urged all American housewives to line up "those pots and pans" for nation-wide collection beginning July 21.

The drive for scrap aluminum, it was predicted, would yield about 20,000,000 pounds of the metal. That amount was expected to meet only a small part of the military demand, since as much aluminum is used in a single bomber as in 60,000 coffee percolators. OPM officials put the military needs for the silver-white metal at 1,600,000,000 pounds in 1942. At present aluminum is being manufactured at the rate of only 635,000,000 pounds a year, a rate that in 1942 may be increased to about 850,000,000 pounds.

The Federal Power Commission arranged for a "pool" of power plants in seventeen States to make available 200,000,000 kilowatts of additional power in the Southeast, where most of the nation's aluminum is being produced. Electricity is vital in the manufacture of aluminum from its chief ore, bauxite. Methods of production are based on the power of an electric current, when-passed through a conducting solution, to decompose chemical compounds into component parts.

## Biggest Land Transport

One of the latest super air liners now in production in the Lockheed plant in California is a sixty-four-passenger plane. This will be the largest land transport yet built and has been under secret development for the past two years. TWA and Pan-American Airways have each ordered forty of the new sky leviathans which will bring any capital in South America to within sixteen and one-half hours flying time of the United States.

# Grass Root Reveries

By JOE GANDY  
Winnboro, Texas.

(Copyright, 1941, by the Southwest Magazine Co.)

WELL, I am back home on the farm after a torrid time at Austin. The 47th Legislature was a long session—the longest ever—and could have ended sooner had we members got down to business and stopped rag chewing. But all well-regulated Legislatures have a certain amount of rag chewing. What a member has on his chest he must get off or bust a button. Several hundred bills died on the calendar. Some bills were talked to death. Some bills passed both houses, were sent on to the Governor, who just let them die without his signature. So there was death all around me and I was lucky to escape alive. I got back home in time to plow the weeds out of the corn and to fix up the fences. Now, I am ok, at peace with the world and owe no man anything except the banker who has been patient and long suffering.

Since home-coming from Austin I have appreciated more the small town near where I live. Friends have greeted me like a long lost brother; have made me feel like somebody, not just a Legislator. In a city as big as Austin no one pays a country boy any attention. I passed thousands on the street who never even looked at me, much less say, "howdy yo do!" They don't mean to be impolite; just don't take time to get acquainted. I could never be happy living in such place. It's different in Coon Creek. Here everybody greets everybody and will stop a

while to chat. No one in a hurry. When a baby is born or a wedding is announced the town's all agog about it. Far better to live and die in a small town—you get more attention while living and more sympathy while dying. The Lord loves small towns or he wouldn't have made so many of them. In Texas there are, according to the last census, 3,114 towns and villages under 3,000 population. Wish I had time to visit and meet the folks in every one of them.

"Friends have greeted me like a long lost brother."

A popular woman writer in the newspapers says the world is starving for human kindness. She is right. If people were kinder to each other there would be no wars. Race hatred breeds war. Hitler rose to power on Germany's hatred of France and of England. He promised his people revenge and they have it, but I predict they will pay a dear price for it. "Revenge, at first though sweet, bitter ere long back on itself recoils." Some day some man will sell the world on human kindness, and he will be the greatest man in the world—greater than Hitler ever hoped to be.

I see in the papers where lightning killed three Texans. Two men were killed while working in their fields and a woman was killed while coming out of a storm-cellar. You never know when or where lightning will strike. It strikes inside as well as outside a house. We used to depend on lightning rods for protection—and I still believe they are effective—but that sounds old-fashioned now and no modern house is equip-

## The Great American Home

"Yes, sir, I'll be delighted to participate in your Junior Quiz Program. . . . Yes, you may quote me as saying that I owe my knowledge to my parents' cultural reading."

# BRIEF TEXAS NEWS---from Over the State

## THE POOR TAXPAYER

The poor taxpayer hasn't a chance. There are approximately 9,000 separate local taxing subdivisions in Texas each with the power to levy and collect taxes.

## CAT ADOPTS BABY SKUNK

Coleman Chronicle: "A mother cat owned by R. G. Riley, local salesman, has adopted four baby skunks, and is looking after them with the same care that she does her two young kittens."

## ROSIE'S HUMAN FRAILTIES

Rosie, small mascot burro of U. S. Army fliers at Hick's Field, 10 miles north of Fort Worth, has succumbed to human frailties. She drinks cokes excessively and chews tobacco.

## \$45,000,000 BOMB SHELL PLANT

The War Department has been given immediate possession of 24,200 acres of land west of Texarkana for use of the \$45,000,000 Lone Star bomb shell loading plant to be constructed as part of the national defense program.

## FARM INCOME UP

Total sales of farm products in the State during January to May, 1941, amounted to \$122,000,000—23 per cent more than the same period in 1940—University of Texas Bureau of Business Research reveals.

## DRIVER SETS RECORD

Corpus Christi Times: "Othal A. Kinnel, 41-year-old taxicab driver has driven his taxicab in Corpus Christi seven days a week for 12 years, averaging approximately 100 miles per day, and has never had a wreck of any kind. At an average of 100 miles per day for 12 years, he has driven his cab a total of 426,000 miles."

## BLACK WIDOW SPIDER EATS MATE

Eight weeks ago Mrs. Thelma Greer, 1711 Forest Avenue, Dallas, caught a black widow spider and her mate and put them in a fruit jar. A few days later the black widow ate her mate, built a nest and then proceeded to hatch out about 50 baby spiders.

## LAKE EARNS FARMER \$20 AN ACRE

A farmer with a six-acre lake near Gilmer, (Upshur county), has earned \$20 an acre each of the four years since the lake was constructed. He charges 50c a day for fishing privileges, which gave him more easy cash per acre than any of his other land.

## CAMPAIGN AGAINST MALNUTRITION

The Texas State Nutrition Committee has pledged its services in helping wipe out all Texas deaths due to malnutrition. Approximately one-third of the 380,000 men rejected for military service this year were suffering from malnutrition, reports of the committee indicated.

## LIBERTY BOND MONEY USED TO BUY DEFENSE BONDS

Twenty-three years ago Technical high school pupils and teachers of Dallas raised money to buy liberty bonds. Word War I ended before the money was invested. Now it amounts to \$1,250, including interest from the bank where it has remained. The money will be used to buy defense bonds.

## CONTRACT LET FOR 10 MINE SWEEPERS

Commander E. B. Perry, supervisor of United States shipbuilding, has announced the laying of 10 keels for as many 135-foot United States mine sweepers, to be built for the Navy at the Weaver Shipyard, in Orange, Texas. This contract, signed several months ago, was for \$3,340,000. The vessels will be complete for operation in a year's time.

## DEHYDRATING SWEET POTATO PLANT

Gilbert C. Wilson, young inventor of a process for dehydrating sweet potatoes, will erect and begin operating this fall a two-unit dehydration and processing plant just two miles from Denton, (Denton county).

Among the products which Wilson has developed, and which seem to offer the greatest opportunities at present, are a whole sweet potato edible flour of a golden yellow rich color and a livestock feed said to be almost the equal of corn in feeding value.

## ARLINGTON DOWNS STABLES SOLD FOR LUMBER

Some of the \$3,000,000 racing track plant between Fort Worth and Dallas, are being torn down and sold for lumber.

"We are wrecking some of them, and we may tear down all of them," G. W. Turpin, manager of the W. T. Waggoner estate, said. "We can get a good price for the lumber now," he added, "and by tearing them down we are riding ourselves of the constant maintenance expense." He further said that no decision has been made to tear down the steel grandstands.

## CHAIN-LETTERS VIOLATE LAW

Dispatching chain letters for any reason whatsoever is a violation of the postal laws and regulations that will be ferreted out and punished, warned Postmaster J. Howard Payne of Dallas.

## 1,548,023 SCHOOL CHILDREN

According to State Department of Education census there are now 1,548,023 scholastics in Texas; statisticians figure the number will be approximately 1,540,000 for 1942. The current figure is about 10,000 less than the census for 1940's school children.

## OVER \$43,000,000 FOR SCHOOLS

The State Board of Education fixed the school apportionment at the law's maximum of \$22.50 per child. With the gross \$34,650,000 apportionment and an \$8,444,190 additional, the public schools of Texas will receive a total of \$43,095,190 in State funds during the next scholastic year, beginning September 1.

## RANGES ABOVE AVERAGE

Condition of Texas livestock ranges on July 1 was 15 per cent above average, the U. S. Agriculture Department Marketing Service reported. Condition of all ranges was rated 96 per cent of normal, which is 15 per cent better than average. Despite heavy infestation of insects, cattle were reported to be in 92 per cent normal condition and sheep in 89 per cent normal condition.

## MEMORIAL TO FIRST OIL GUSHER

A Texas pink granite monument, costing \$12,000 and already under construction will arise 58 feet two inches above the spot where the world's first real oil gusher blew in on January 10, 1901, at the famous Spindletop oil field near Beaumont. The monument is to be a memorial to what was then known as the great "Lucas Gusher." The well blew in unexpectedly while the drilling tools were in the hole and ran wild for several days. Two of the drilling crew were killed while helping to bring the well under control.

## DEMPSEY WILL DRILL WILDCAT WELL

Former Heavyweight Boxing Champion Jack Dempsey will drill a wildcat oil test well in Wood county, (East Texas). Dempsey is in partnership with his former ring sparring partner, Bobby Manziel, who now is an oil operator. Manziel drilled the discovery well in the Hawkins field of Wood county.

## 47TH LEGISLATIVE SESSION

There were 1,615 bills introduced during the 47th Texas Legislative session, of which 665 became laws. Governor Lee O'Daniel vetoed 21 bills and 8 bills were passed over his veto to become laws. The session cost the taxpayers over one million dollars.

## FSA ALLOTS TEXAS \$4,297,245

The largest amount—\$4,297,245—was earmarked for Texas in July as the Farm Security Administration made a tentative allocation among States of \$50,000,000 appropriated by Congress for loans to tenants for purchase of farms. The FSA said the \$50,000,000 should provide loans to approximately 9,000 families for purchase of farms on easy-payment terms, payable over 40 years with interest at 3 per cent. The average cost of farms thus far purchased has been \$4,200.

## SCHOOL THRIFT

Pupils of Dallas public schools had a balance of \$447,327 in their thrift savings accounts in a local Dallas bank at the close of the school year. The balance was the highest in the history of the thrift savings program.

## 21-YEAR-OLD DRAFT REGISTRANTS

State Selective Service Director J. Watt Page announced that 34,530 young Texans registered for the draft July 1.

## SISTERS PITCH NO-HIT, NO-RUN GAME

The Stallings sisters, Martha and Billie, pitched the first joint no-hit, no-run game in softball history at La Feria, (Cameron county). The score was La Feria, 10; Donna, 0.

## WHY QUAIL DECLINE

Dr. A. J. Nicholson, of the Texas Game Commission, says this about the decline of quail: "The quail population of Texas has been going down steadily over a number of years. The reason for this are lack of winter food, lack of adequate cover, and over-hunting. The most important thing to do is to go out and improve the conditions in which the quail live."

## FRIED CHICKEN BAIT CATCH RED SNAPPERS

Houston Chronicle: "When two Brownsville fishermen, Earl Hunter and Ronald Southerland, ran out of bait while fishing on the red-snapper banks 22 miles off shore from Brownsville, they used fried chicken for bait and claim that they caught plenty of snappers with this kind of bait. The fried chicken was their lunch and the boys came home hungry though happy."

RELAXING AT RANDOLPH—Having done their daily turn in the skies at Randolph Field, Army Air Corps training base in Texas, a trio of cadets "watch the other fellow" go through the paces, 3,000,000 candlepower lights (rear) light field at night.

## INTERNAL REVENUE COLLECTIONS INCREASE

Internal revenue tax collections increased in Texas from \$131,480,045 to \$173,564,698 during the fiscal year ended last June 30, the Treasury reported.

## BURGLAR EATS, DRINKS, GOES TO SLEEP

A negro broke into a barbecue stand at Silbee, (Hardin county), ate a pound of the meat and drank three bottles of beer. Then he stretched out on a table and went to sleep. Proprietor W. R. Cobb found the negro still asleep when he opened up next morning. Officers took him to jail.

## DON'T ROCK THE BOAT

The State Game Commission gives this advice about handling boats: "Never overload a boat, nor allow occupants of a boat to stand up in it."

"Every boat should be equipped with one life preserver for each person in it, fire extinguisher, lights and good oars or paddles."

"Never leave a motor unattended while it is running. The motor may give a quick turn and throw you into the water."

"And most important of all, leave your bottle at home; water and alcohol do not mix."

## U. OF T. BUDGET \$3,590,074

A 1941-1942 budget of \$3,590,074, up \$235,387 over last year's figure, was approved by the University of Texas board of regents. The allotment was for the main university and its extramural divisions.

## SOLDIERS BUY DEFENSE SAVING STAMPS

Soldiers at Camp Bowie, Brownwood, cannot save much from their small salaries, but Company C, 141st infantry regiment, has signed up 100 per cent in the purchase of defense savings stamps.

## MUSKRAT TRAPPER SUES COUNTY FOR \$36,000 DAMAGES

Claiming that his trapping lands normally would produce 30,000 muskrats, 450 mink and 600 raccoons annually, Trapper Joe Demary asked \$36,000 damages in a district court suit against Jefferson county officials. Construction of a coffer dam on Salt Bayou flooded his lease holdings, he alleged.

## GIVES LEG TO AID DEFENSE

Henry Courtney, of Greenville, (Hunt county), handed over his leg to aluminum collectors. Courtney lost his right leg while fighting in World War I and was wearing an all-metal leg made of aluminum.

"I gave one leg to Uncle Sam in 1918 and I am perfectly willing to give another," he said.

## JOKE ON POLICE

Dallas police became suspicious of a negro sitting on the sidewalk curb with a large cardboard box under his arm. They opened the box and saw several expensive shirts inside. They searched the negro and found in his pockets a cashier's check for \$5,000 and \$663.25 in cash. That was enough—the officers took the negro to jail.

While in jail the negro was able to prove that he owned oil wells in East Texas and had come to Dallas to do some shopping.

## 10,000,000 FISH

Fishing next year should be the best ever. State hatcheries plan to raise and distribute 10,000,000 fingerling fish in Texas streams and lakes.

## 40 PER CENT OF HOLC LOANS PAID

Charles A. Jones, general manager of Home Owners' Loan Corporation, reported that 40 per cent of the millions the corporation loaned to Texas families to help them save their homes has been repaid. Total amount loaned over a five-year period to 44,357 homes was \$103,208,775.

## THIRD ARMY MANEUVER PLANS COMPLETED

Lieut. Gen. Walter Krueger, commanding general of the Third Army, says that preliminary plans have been completed for the largest peacetime maneuvers in American history, to be held in the Sabine area of Texas and Louisiana during August and September.

## CENTURY PLANT BLOOMS

Merkel Mail: "Brought 12 years ago from the foothills of Guadalupe Peak, highest point in Texas, a century plant in the yard of Mr. and Mrs. V. B. Sublett on Oak street, bloomed recently. It had reached a height of 15 feet. The history of the century plant is that it blooms only once and then dies. This plant is already beginning to die."

## "RESTITUTION" MONEY

W. J. Forrest, of Jacksonville (Cherokee county), received \$25 in currency by mail with this note attached: "Dear Sir: Please receive this money as an attempt to make restitution. Yours very truly, 'Trying to be a Christian.' There was no further explanation. The letter came from Greenville, (Hunt county)."

## JULY PENSION CHECKS AVERAGE \$18.54 EACH

The biggest number of old age pension checks in the five-year history of the Texas old age assistance act—144,354 representing \$2,675,965 in cash—were mailed to recipients in July. The checks averaged \$18.54 each. June pension checks averaged \$18.50 each, sent to 139,307 recipients.

## BANK DEPOSITS SHOW INCREASE

Individual deposits of 391 Texas banks totaled \$168,931,544, a \$16,111,911 increase over a year ago, according to a report of State Department of Banking. Deposits of State and other public funds totaled \$23,158,724, having more than doubled in the past year. Cash on hand and that due from approved reserve agents increased \$17,098,922 between 1940 and 1941 for a total of \$92,479,165, the report showed.

## KID CARNIVAL NETS \$1.03 FOR USO

One cent admission for each event raised \$1.03 for the United Service Organizations at the backyard carnival sponsored by 11-year-old Patricia Garrison at her home, 1622 West Twelfth Street, Dallas. Patricia turned the money over to USO headquarters and got a button to wear as a mark of appreciation. Neighborhood children paid in their last pennies to take in the carnival events.

## TOTAL DEFENSE EXPENDITURES IN TEXAS

Texas received \$716,712,315 from expenditures for national defense between July 1, 1940, and June 15, 1941, said Roger Miller, manager of the Southwestern Division, United States Chamber of Commerce. Miller reported that Texas now has 37 army posts garrisoned by 155,000 officers and men, with a total monthly payroll and subsistence allowance of \$13,317,750. That figure does not include navy or civilian payrolls connected with the defense program.

## FACES \$52,000,000 DEFICIT

According to unofficial estimates of the State Comptroller's office, on July 22, based upon a study of appropriations by the 47th Legislature, Texas faces a \$52,000,000 deficit by the end of the next biennium.

Here is how the \$52,000,000 figure is reached:

Estimated deficit on September 1 of this year (end of fiscal year) \$30,000,000.

Excess of appropriations for 1941-42 fiscal year over income for the same period, \$12,000,000.

Excess of appropriations for 1942-43 fiscal year over income for same period \$10,000,000.

## SAGA OF FLAT-FEET JIMMIE

Jimmie Curtis Gilmore, Temple negro, volunteered for the draft but was turned down because of flat feet. Jimmie, not discouraged, then appealed to President Roosevelt in a very touching letter. He wrote:

"Dear Mr. President Roosevelt: 'I still wants to go to the army. I volunteered and it wasn't nothing wrong with me 'cept flat feet. I can march as good as any soldier and shoot as good. I still wants to jine the army. I am as brave as any pusson. Let me go, please.'"

"Write to the selective service local board No. 2 in Temple and tell them to let me go off wid the next negro boys they needs. I wants to be one of Uncle Sam's soldiers."

National draft headquarters returned the letter to Temple local board No. 2. The board was sorry but they couldn't help Jimmie.

# A LITTLE FUN Jokes to Make You Laugh

## The Difference

An inspector, examining a class in religious teaching, asked the following questions of a little girl, intending it for a catch:

"What was the difference between Noah's Ark and Joan of Arc?"

He was not a little surprised when the child, answering, said:

"Noah's Ark was made of wood, and Joan of Arc was maid of Orleans."

## Modern Mary

"He tells me that he's breeding lambs to run 40 miles an hour."

"But why does he want lambs that can run 40 miles an hour?"

"To keep up with Mary."

## Was Still Behind

A salesman who had been traveling on a certain railroad for a number of years was complaining about the trains always being late when, to his surprise, the train came in at 10:30 a. m., on its regular schedule time. He immediately went to the conductor and said: "Here's a cigar for you. I've traveled this road for over 15 years and I'll be hanged if this isn't the first time I ever saw a train on time." "Sorry, sir," said the conductor, "this is yesterday's train."

## Jurisdictional

Foreman: "Hey, what are you doing?"

Bricklayer: "I'm just sharpening my pencil."

Foreman: "Well, hurry up and don't let the carpenters see you. They claim jurisdiction over that kind of work."

## Slightly Inaccurate

Johnny who was permitted to remain for church after Sunday School, was asked to pay close attention and to tell his mother what the preacher's text was when he got home.

Johnny reported the text as, "Many are cold but few are frozen."

What the preacher had said was, "Many are called but few are chosen."

## In-Laws

Mr. Brown: "You don't seem to think very much of your brother-in-law."

Mr. Black: "Say, if that fellow had his infamy cut out he'd be all hollow inside."

## Loyal Representative

A member of the House of Representatives, who was very much impressed by the dignity of his position, was awakened by his wife one night with, "John, there are burglars in the house!"

"You must be mistaken, my dear," replied the solon, sleepily. "There may be a few in the Senate, but in the House—the idea is preposterous."

# Poultry News Dried Eggs Poultry Profits

## Dried Eggs

Dried eggs fit well into the national defense program and answer adequately the need for putting food into a concentrated form for shipment to Great Britain. This fact has been encouraging to the dried egg industry and has brought several additional plants into operation. Two of the largest egg drying plants are located in Fort Worth, Texas, and Omaha, Neb.

Several interesting things about dried eggs can be related to show the advantages of concentrating a product and also to show that eggs lend themselves to processing in different ways. About 38 average size eggs are required to make one pound of dried material, and it is estimated that 40 carloads of feed can be concentrated into one carload of dried eggs.

Dried whole eggs are easy to reconstruct by simply adding 3 parts by weight of water to 1 part of dried eggs. The mixture must stand 4 to 5 hours to allow the normal liquid consistency to return.

## One Way to Break a Hen From Setting

To break a hen from setting she should be fastened to a coop with a wire or slatted bottom and fed liberally on laying mash, advises D. F. King, of the Alabama Experiment Station. King warns not to make the mistake of shutting broody hens up without feed or water. Even though mistreating a hen does stop her setting she is in no condition to lay again for several weeks. If hens are caught the first night they remain on the nest they can usually be broken from broodiness.

## Poultry Profits

Poultry profits cannot be expected unless the flock is large enough to warrant the necessary time and attention. Cost studies have indicated that labor cost per bird and per dozen eggs is twice as high in flocks of 100 to 150 as in flocks of 300 to 400 birds. Egg production has also been found to be greater in the larger flocks.

Chicks need lots of fresh air, so be careful not to close them up in a tight brooder without proper ventilation.

## Unintentional

Husband: "Who's that lady with the little wart sitting in front of us?"

Wife: "Sh-h! Don't talk so loud. That's her husband."

## Wiser Than the Judge

An inebriate boarded the English railway train and spied a vacant seat. Stumbling toward it, he asked the other occupant to move over, a request which was reluctantly granted. The liquor-ed one asked: "Say, aren't you the Lord Chief Justice?"

Receiving no answer, he waited a bit and then repeated the question. The Lord Chief Justice finally replied in a tone of impatience, "Yes, sir!"

"Say, Mr. Justice, you think you know everything, but I know something you don't know. My wife is your wife's washerwoman and I'm wearing one of your undershirts."

## Smart Mary

Jerry: "Yes, sir, it took me twelve long lessons to teach Mary Jenkins to swim."

Terry: "Why, the little flirt, I taught her in six."

## Par for the Course

The magistrate was a very keen golfer. He was trying the case of a man who was summoned for cruelty to his wife.

"My client," said the defending counsel, "is a much maligned man. His wife is constantly nagging him and in the end, driven to desperation, he knocked her into silence with a golf club."

The magistrate leaned forward with a sudden show of interest.

"In how many strokes?" he questioned.

## Tough Place

"Say, waiter, this certainly is a tough steak."

"That's right, sir, we don't serve any of that sissy food here!"

## No Such Person

Colonel (roaring): "Confound you, why don't you be more careful?"

Army Clerk: "What do you mean, sir?"

Colonel: "Why, instead of addressing this letter to the Intelligence Office, you addressed it to the Intelligent Officer. You know there's no such person in the Army."

## Explanation

"Doctor, what's the difference between rheumatism and gout?"

"Well, first put your thumb in a vise, and screw it so tight that you can no longer endure it. That's rheumatism. Give it one more turn and that's gout."

# Nazi Army Invades Russia

(Continued from Page 2)

of communication. There will be not only the lack of transportation facilities affecting their front-line military operations but there would be the very important issue of inadequate roads for the supply lines of the Germans. Time and distance may well work strongly to the advantage of the Russians.

In his other campaigns in this war Hitler has had the advantage of numerically stronger forces. True enough, he has had the advantage of a superior aviation and better mechanization, but also he had the most men. Now, so far as numbers are concerned, the tables have turned. There are reports of 8,000,000 men being put into the Russian forces, and that is more men than Hitler can bring up. Of course, too large deductions are not to be drawn from this circumstance. One must not forget the factor of the number of planes and the number of tanks of which the Germans are probably much superior. Certainly they have more planes. But if it comes down to a war of attrition, man power may prove an important element. It will depend on how many men Moscow can equip. But, anyhow, Russia has twice as many potential soldiers as has Germany and that ought to count for something if the fight lasts long enough.

That numbers are considered important is indicated by the evidence that nearly two-thirds of the existing German Army is being used in the drive against Russia. In addition to pulling troops from southward and westward to use them eastward,

the indications are that a great part of the German air strength is being massed against the Soviets. Thus, there is going to be, as never before, a test of better mechanical equipment against larger numbers of men.

## Herr Hitler's Big Job

While most critics believe that the Germans can defeat an equal number of Russians, given their better equipment, it must be recognized that this is not a pitched battle in the old sense of the term. The Russians have plenty of room behind them in which to withdraw if their military organization holds together. The farther Hitler goes the more difficult is his job in many respects. He can advance many miles more and a great part of the Russian war industrial areas will still be out of his reach.

Of course, there is no denying that if the Germans can reach Moscow they will have dealt a terrible blow to Stalin's prestige and to Russian military strength. But it would not be necessarily a fatal blow. There are already reports that the Kremlin is making plans against the necessity of having to quit Moscow, the Soviet capital.

Looking at it another way, Hitler has got to win the Russian campaign or face disaster. He is putting his best armies and strongest efforts into the fight. If the Russians can stop him and hold him and continue the fight on any terrain, he will find himself in a tough plight. His prestige will suffer enormously both at home and abroad. He needs a complete victory over Russia and he needs it now.

It is nothing to you, all ye that pass by? Lam. 1:12.

## TUNG OIL

The matter of refinishing a maple tabletop or touching up a mahogany cabinet may soon be such a serious item as to involve priorities. Such jobs involve the best varnishes and the best varnishes call for tung oil as the drying ingredient. China is the chief source of tung oil, which is extracted from tung nuts, and Japan is second. The United States imported nearly 100,000,000 pounds of tung oil last year and produced about 5,000,000 pounds domestically in the South. Part of the industrial economy of the South is the combining of its plentiful resin with tung oil to make varnish. The Department of Commerce reports that stocks of tung oil at Hong Kong and Hankow, China, are very low. The amount brought into Hong Kong in April, 1939, was 392 tons, as against 4,630 tons in April, 1940.

In 1940 there were a number of tung orchards in Newton, Jasper and other southwestern Texas counties. Some authorities foresee a commercial tung oil industry in the southwestern part of the State which apparently is adapted to tung production.

All taxes in 1940 totaled \$14,300,000,000. Each person's share averaged \$109, of which \$39 were Federal taxes; \$27 State taxes, and \$43 local government taxes. Each family's share of tax collections averaged \$410.

SMOKING IS MORE FUN WITH CAMELS. THEY'RE EASY ON MY THROAT—EXTRA MILD

The smoke of slower-burning Camels contains

# 28% LESS NICOTINE

than the average of the 4 other largest-selling brands tested—less than any of them—according to independent scientific tests of the smoke itself

The name is Dorothy Van Nuys. The place—California's popular Santa Barbara. The cigarette—America's favorite—C-A-M-E-L!

SHE SWIMS...she rides...she's typically modern in her zest for the active life. Typically modern, too, in wanting to know the scientific facts about the cigarette she smokes. In choosing Camels, Dorothy Van Nuys enjoys the scientific assurance of a slower-burning cigarette. That means more coolness, freedom from the harsh, irritating qualities of excess heat...extra mildness. And she knows, from independent laboratory reports, that in the smoke of extra-mild Camels, there is less nicotine.

(See above, right.)

R. J. Reynolds Tobacco Company, Winston-Salem, North Carolina

WITH CAMELS, I DON'T GET TIRED OF SMOKING; THE FLAVOR IS ALWAYS INVITING

# CAMEL

THE CIGARETTE OF COSTLIER TOBACCOS

YES, DOROTHY VAN NUYS, and the important point is: Camel's extra coolness—and other Camel advantages are in the smoke. After all, it's the smoke you smoke. And in the smoke of the slower-burning cigarette of costlier tobaccos there's more coolness, more flavor, extra mildness—with less nicotine.

The smoke's the thing! Smoke out the facts about milder smoking pleasure yourself. Dealers feature Camels by the carton. For economy—convenience—get your Camels by the carton.

BY BURNING 25% SLOWER than the average of the 4 other largest-selling brands tested—slower than any of them—Camels also give you a smoking plus equal, on the average, to

## 5 Extra Smokes Per Pack!

# TEXAS FARM NEWS REPORTS

Economists estimate that more than two-thirds of all Texas farmers use short-term credit.

Heaviest infestation of flea hoppers in many years is expected in Texas cotton patches this summer by Texas entomologists.

Through a new process, chemurgists report that corn sugar may replace approximately one-fourth of the cane sugar now used in manufacture of ice cream, ices and sherberts.

H. C. Henderson arrived from South Texas and parked his truck loaded with watermelons on a Dallas street while he went into a cafe to eat. When he returned, according to report, he found someone had driven his truck a block down the street and had done a land office business on cut-rate melons, pocketed the cash and left.

Orland Sims, Concho county ranchman, believes "speltz" may be the solution of the feed problem in West Texas. Speltz is a new grain which proved its sturdiness by resisting recent high winds and heavy rains which flattened an oat field near by. The speltz field was still erect and able to hold up a man's hat, while the oats were flat when the storm had passed.

Floyd Derrick, Word ranch cowboy, (Donley county), claims to have roped an owl on the wing. Derrick said he was on horseback when he saw the owl swoop from an embankment. He galloped along the creek bed, swinging his lasso 20 feet into the air, and roped the bird. As further proof of his feat, Derrick has an eye witness in Pete Knantz, ranch manager.

Texas dairymen are raising their milk production in response to the appeal of Secretary of Agriculture to furnish the cheese and evaporated milk required by Great Britain and her allies. According to G. G. Gibson, assistant dairyman of A. & M. College extension service, a cross-section of replies to a questionnaire indicated that the 1941 volume of milk in Texas will exceed that of last year by about 15 per cent.

A new circular No. 92 dated May, 1941, has been issued by the Texas Agriculture Experiment Station entitled, "Simplified Instructions for Control of Cotton Insects," by F. L. Thomas, division of entomology A. & M. College. The circular will be valuable in the destruction and control of flea hoppers, boll weevils and cotton bollworms which, because of heavy rains this year, will be more numerous than usual. Copies of the circular may be obtained without charge by writing the Experiment Station at College Station, Texas.

Californians like Texas eggs, it seems. One out of every fourth Texas-laid egg exported to other states goes to California, a University of Texas Bureau of Business Research report shows.

A mammoth sunflower has been grown by Mr. and Mrs. W. H. West, of Olney, (Young county). The tame sunflower measured 14 inches, the blossoms weighed 4½ pounds and with 25 seeds to the square inch it is estimated it had 6,340 seeds. The stalk is six feet in height, says Mr. West.

RANCH LAND DIVES 50 FEET DOWN

Bean plants on the Santa Margarita Ranch, near Oceanside, Calif., aren't a bit disturbed by the fact that they are 50 feet below those growing at normal field level. Engineers are studying the land subsidence. For a time, the land dropped at the rate of a foot a day.

In the garden of Mrs. F. Longmire, of San Antonio, (Bexar county), is a tomato vine that is now more than 9 feet tall—and still growing. Mrs. Longmire reports that the tomatoes grow in clusters of 3 and 4 each, and some of them weigh as much as 14 ounces each.

More farmers' co-operatives have been established in Texas since 1930 than in any other State, a recent survey by the Houston Bank for Co-operatives and the Farm Credit Administration shows. It is estimated that one-third of the Texas farm and ranch families now are members of the State's 840 co-operatives.

Bill Jowell, of Covington, (Hill county), who has been experimenting two years with ground corn cobs as a substitute for cottonseed hulls in feeding cattle, has found that when fed with cottonseed meal the ground cobs were more fattening. However, he revealed that ground cobs tended to slacken instead of increase milk production in dairy cattle.

Dairy specialists say that a cow producing about 24 pounds of milk per day is now selling in Texas for \$75 or more.

Rural electrification has brought light and power service to more than 45,000 farms in Texas, REA figures reveal.

The 1941 peach crop will be the largest since 1919 in Texas, according to the Agriculture Department's report of condition on June 1 indicating production of 66,102,000 bushels.

Texas has 10 State and five Federal fish hatcheries.

The size of Texas farms has shown an average increase of 77 acres during the past decade, according to recent farm census.

A bumper crop of wild plums and grapes seem certain in the section from Salt Fork to Bitter creek in Donley county. Grape vines clinging to cliffs or entwined about trees are growing the heaviest crop of wild grapes since Indians roved this region, it is believed.

Continuous rains and late planting are blamed for the failure of experimental planting of cabbage near Bartlett, (Bell county), farmers report. Some of the cabbage has already been plowed under, but many growers still believe cabbage could be successfully raised in this section on a commercial basis in favorable seasons.

A new crop, safflower, is almost sure to become an important crop in Northwest Texas, following tests at the Chillicothe experiment station. There will be about 200 acres of safflower in Hardeman county this year, and station workers expect to mill 40 to 50 tons of this oil-seed crop so that the value of the products may be determined.

After 15 years of experimenting, Walter R. Bunch, a 72-year-old grade school teacher of Fort Worth, (Tarrant county), has announced that he has discovered a method to make a combination fire extinguishing and fumigating fluid and a face cream from supposedly worthless pecan shells. Bunch hopes the products will provide the nucleus for a new industry in the State. He also says he can manufacture dye to color soldier's uniforms from pecan shells. Ten pounds of pecan shells would yield a gallon of fire extinguisher, Bunch claims.

Farmers in Texas are expected to co-operate fully in the United States Department of Agriculture's appeal for increased production of tomatoes for canning for shipment abroad under the Lend-Lease Act. Producers participating in the program will not incur any deductions from their AAA payments because of increases in acreages of tomatoes for canning, according to AAA State administrative officers. The increased production will also be distributed by the American Red Cross under the school lunch, relief and other programs.

## "MAKIN'S" SMOKERS! STEP OUT FOR Milder, Tastier Smokes! P.A. Rolls Faster, Easier, Too!

In recent laboratory "smoking bowl" tests, Prince Albert burned **86 DEGREES COOLER** than the average of the 30 other of the largest-selling brands tested—coolest of all!

*Says O'Leary*

**PRINCE ALBERT SPINS SO EASY I CAN ROLL 'EM FAST WITHOUT EVEN LOOKING—NO SIFTING OR BLOWING—AND EVERY SMOKE TRIM, FIRM, MILD, GOOD-TASTING, RICH. P.A. GETS THE PALM FOR NO-BITE SMOKING JOY. COOL IN PIPES, TOO!**

**70** fine roll-your-own cigarettes in every pocket tin of Prince Albert

H. J. Bernhardt Tob. Co., Winston-Salem, N. C.

R. N. Kirkpatrick, versatile agriculturist of the Overland community, (Hopkins county), exhibited five extra large beets which weighed 5¼ pounds.

Dehydrated sweet potato meal may be substituted satisfactorily for one-half the grain portion of a ration for fattening beef calves, it has been demonstrated by an experiment just conducted by the Texas Agricultural Experiment Station in co-operation with the animal husbandry department of A. & M. College.

An increase of 35 per cent in the acreage planted this season to dry edible beans of the white varieties is sought by Secretary of Agriculture C. R. Wickard. The Department has announced that increased acreage of the white and medium white beans, Great Northern and small white beans will not incur any deductions from AAA payments. The increase will be required to assure adequate supplies and reserves to meet the needs of domestic commerce, export and other emergency demands.

A bill appropriating \$250,000 to start a program aimed at increasing consumption of cotton and its products has been signed assuring a cotton research laboratory for Texas. The bill allocates \$150,000 for the year ending August 31, 1942, and \$100,000 the following year assigning funds for purchase of a laboratory, equipment, maintenance, salaries and supplies. Expenditures of the funds will be directed by a committee composed of presidents of the University of Texas, Texas A. & M. College and Texas Technological College.

Texas claims more than two-thirds of the co-operative gins in the country, and Texas farmers' co-operatives have more than \$7,500,000 invested in land, buildings and equipment, according to official statistics.

It's lemon time the year around on the Rio Banco farm, six miles south of Mercedes, (Hidalgo county). C. P. Melton, owner of the farm, reports he has been shipping lemons every month this year, except February. He has a thousand Chinese lemon trees. The Rio Banco farmer ships all of his lemons green.

The first carload of sliced onions ever shipped in the United States left Floresville, (Wilson county), bound for Wisconsin recently, according to the manager of a local packing company. A huge vat containing 2,100 bushels of green onions was used in the processing of this first shipment. Exactly 11 tons of salt were used. The car contained 130 barrels of the sliced onions put down in brine.

In about a year McLennan county farmers will have access to a complete survey of the soil of this county which among other things will tell them what to plant and what not to plant on their land. E. H. Templin, who is conducting the survey, states that the purpose of the survey is "to investigate the land resources and present the information in such a simple way that it can be used by persons who are not specialists." To date Templin has found over 100 different types of soil in McLennan county.

Thirty years ago, Texas prairie land supported 1,125,034 horses and mules. As of April 1, 1940, this figure had been more than halved, to 638,408, according to a United States Census of Texas agriculture. The decrease has been continual.

How a farmer can lose \$40,000 in one night through no fault of his own was demonstrated on the Trinity river in Madison county recently when W. M. Forrest inspected a 900-acre field of fine cotton on his plantation one morning, and a day and two nights later he looked at the same spot and saw only a body of water two miles wide. Flood waters which accumulated on the Trinity above Dallas and Fort Worth finally had reached Madison county. Mr. Forrest estimated he would have made 500 bales of cotton on his 900 acres which would have been worth with seed about \$30,000.

**PEAT**  
 In Ireland extraordinary measures are being taken in the peat harvest this summer to make sure that there will be fuel for Irish hearths when the autumn wind blows cold. The peat turf cutters will try to cut two full harvests in one, owing to the scarcity of coal imports. One-seventh of the total area of Ireland is peat bog, and the cutting of turf is as important in most areas as the cutting of cordwood is in many parts of North America. Although machine methods are used in a few places, most of the cutting is done by three-man teams. A cutter uses a sharp "slean" or spade to cut the sods, then tosses them up to the catcher, who must keep them whole and neat and stack them for the wheeler, who carries them off in a wheelbarrow and dumps them in a particular way for the first stage of drying. After a few weeks they are stacked into ricks for further drying, and they are ready for use in the early fall.

Peat is a product of decayed vegetation and found in the form of bogs in many parts of the world. The plants which give origin to these deposits are mainly aquatic, including reeds, rushes, sedges and mosses. The peat bogs of Great Britain and Ireland vary in thickness 5 to 30 feet, and those of North America vary from 5 to 25 feet.

Come now, and let us reason together, said the Lord. Though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool. Isa. 1:18.

**Our Boys and Girls**

AUNT MARY, Editor, 1809 Ashland, Fort Worth, Texas.

**ADIEU, VACATION**

DEAR FRIENDS:  
 So this is August, the last vacation month. Soon boys and girls will be trudging back to school with healthy sun-tans and a store of interesting things to tell their class mates. How happy they should be. Of course, they will find the first few days at school hard, but soon they will forget all that. They will be glad to see their friends and greet their teachers again.  
 Young America likes to play hard and to work hard, and no one has a better time at it than school boys and girls. Our happiest days after we grow up are remembered as school days.  
 Many vital things have happened since school "let-out" for the summer. World conditions have changed that may eventually change our lives in America. List how many things you have learned this summer and take them to your teacher. She will be surprised and pleased to know what you have learned.  
 Write the Boys' and Girls Page about your vacation. See "Contest" on this page.  
 Love to all,  
 (Signed) AUNT MARY.

**Kiddies-Can-Do-It** By Uncle Cobb Shinn

**HAVE** you ever been in the country and seen this pretty Meadow Lily in bloom? You find it in low meadows, moist fields and swamps, growing on a stalk about five feet tall. The flowers nod on long slender stems from the top. They are yellow spotted with reddish brown, bell shaped and from two to three inches long. Get your water colors and see if you can make a water color sketch of these Meadow Lilies.

**14-YEAR-OLD ALICE TODD CAPTURED BY INDIANS IN 1863**

The Menard (Texas) News, in a recent issue, published the following story about the capture by Indians in 1863 of Alice Todd, of Mason, Texas:  
 The inside story of how pretty 14-year-old Alice Todd, of Mason, Texas, was captured by the Indians late in December, 1863, is told at last by a school-mate of Alice's who still is alive and a prominent citizen of Rock Springs, Texas.  
 She is Mrs. Mollie Vaughn Winn, age 88, daughter of the late William J. Vaughn, pioneer settler of Menard county and founder of the irrigation ditch there. Mrs. Winn recently gave the true facts to her sister, Mrs. Whittie Vaughn Noguessa, of Menard.  
 Mrs. Winn says no trace was ever found of Alice following her capture in a bitter snowstorm that wintry day, out on the hills near Mason.  
 "We lived at the time in Brown county, on Clear creek," said Mrs. Winn. "We moved a short time afterwards to Menard county. But well do I remember how father and a neighbor, W. C. Dunn, went in an ox-drawn wagon to take me to San Saba, Texas, to place me in school. They were heavily armed and, on the way, we spent the last night with Jack Brown's family who lived on Richland creek, about where Richland Springs, (San Saba county), now is located. Next morning we were joined by 'Beardy' Hall, nick-named 'Beardy' on account of his long beard which came down to his waist. He rode a beautiful gray horse, named 'Gray John'.  
 "When we were about two miles from San Saba, at that time only a small settlement, Hall left us with the intention of visiting Captain Woods, a friend. He called to us, as he rode off: 'See you in town'.  
 "Father warned Mr. Hall of Indians, as he was alone and only armed with a six-shooter. Mr. Hall patted his horse on the neck and said, 'Gray John will carry me out of all danger.' But the Indians killed him before he reached Captain Woods' home. They must have caught him alive as his body was horribly mutilated and showed he had been tortured in a most brutal manner. His head had been scalped in the usual Indian fashion, just a portion of the scalp taken from the top of his head. Father helped bury him. They had long been friends.  
 "I was left in school at San Saba. Alice Todd, Martha and Nannie Greenwood and Maria Crosby, all of Mason county, were there to attend the same school. The teacher was a Mr. Doyle. Alice Todd was about 14 years old. She had a sweet, kind disposition and I loved her dearly.  
 "All of the girls except myself went to their homes to spend the Christmas holidays. The Indians were so bad father thought it best for me to stay in San Saba, so he would not have the danger of going for me and taking me back to school after Christmas.  
 "When the holidays were over, Mr. Todd and his wife started back to San Saba with Alice to put her in school there. They lived a few miles out of San Saba. Both rode horse-back. Mrs. Todd had a negro girl riding behind her and Alice rode behind her father.  
 "The Indians suddenly charged upon them, killing the negro girl and wounding Mrs. Todd so severely that she died five days later. Mr. Todd said when the Indians charged that his horse ran away with him and that Alice fell off the horse and the Indians captured her.  
 "The night after Alice was captured by the savages, there was a terrible snowstorm that lasted several days. The snow measured fourteen inches on the level.  
 "R. A. Winn, whom I had not met at the time but whom I later married, was among

**CONTEST**

**What to Do**  
 Write a letter of NOT MORE than 250 words describing your vacation. You may write about any trip you made, or something beautiful you saw, or just a general letter about your vacation. The only requirement is it must be about your vacation THIS summer.  
**Rules**  
 1. Letter must reach Fort Worth before September 1, 1941.  
 2. Letter must not have more than 250 words.  
 3. Letters must be written on ONE side of paper only with number of words, name and address on all sheets. Also name of newspaper in which you saw this contest. The letters will be judged on neatness, reader interest and originality of thought. Decision of the judges will be final. No letters can be returned. Address your letter to Aunt Mary, 1809 Ashland, Fort Worth, Texas.  
**Prizes**  
 First prize will be \$2.00 in cash.  
 Second prize will be a year's subscription to the newspaper in which you saw this contest. In case you already have a paid up subscription, paper will be extended a year beyond paid up date, or you may send paper one year to any other person you name. Think of the fun, aside from the prizes that this contest will afford. Isn't that worth a letter? You bet it is. Sit right down and write that letter. YOU have as good chance to win as any one else.

**THE FRIENDLY HOBBY CLUB**

We are so delighted the way the Friendly Hobby Club is growing in membership. Each month many new names are added to the list. The many interesting letters sent me by members show how much they like the club. It is like anything else—you get out of it what you put into it. This month if you will put into it a little time you may win a cash reward. (See "Contest" above). Join the fast growing Friendly Hobby Club now and get in (Continued top next column)

the swing of winter doings—that is, doing useful things.  
 JOIN TODAY.

**Rules for Joining**  
 Here are the rules for becoming a member of the Hobby Club. You will please note one change, that is, you may join only ONE department.  
 1. There are no fees or dues now or at any time.  
 2. All that is required is for you to fill out the coupon below and mail it at once to Aunt Mary, 1809 Ashland, Fort Worth, Texas.  
 3. You will receive your membership card, list of instructions and secret code as soon as we get your coupon.  
 4. You may join only one department—but NO MORE. The departments are as follows: (A) Friendly Correspondence, (B) Sunshine for Others, (C) Stamp Exchange, (D) View Cards, (E) Miscellaneous, (1) Coins, (2) Curious, (3) Souvenirs, (4) Butterflies, (5) Clippings, (6) Books, (7) Postmarks and (8) Magazines.

**MEMBERSHIP COUPON**

The Friendly Hobby Club  
 Pledge: I promise to be fair and square and to do my best in all that I undertake.

 Please check no more than 1 of the above.

**DEFENSE BOOM IN JUNK**

Things we used to throw away are being salvaged and turned into many kinds of munitions.  
 There may seem to be an unbridgeable gulf between the humble junkman with his spavined nag and battered wagon loaded with junk and the giant industrial plants that are turning out war materials. But the gulf is more apparent than real and today the collector of waste materials has become one of the most important cogs in our colossal armament machinery. The junk he laboriously gathers is as vital to the functioning of a steel mill or a brass cartridge factory as the expensive, brand-new raw materials.  
 The junkman is the advance guard of an army of some 300,000 people who diligently ferret out waste, collect it, prepare it and then channel it into the maw of industry.  
 Scrap has become so important that some types of old metal were the first to be put under priorities and price control to prevent the price from rocketing. The demand is so great in some metals that the government has ordered at test campaign for the collection of scrap aluminum in two cities, Madison, Wis., and Richmond, Va. Through these tests the government will be able to determine just how much useful scrap aluminum could be gathered on a nation-wide scale.  
 The first World War gave a tremendous impetus to the waste-material industry and the present emergency is booming it even further. In 1917 ponds filled in with refuse were drained to salvage scrap iron, which had jumped to \$35 and \$40 a ton. That will not be necessary this time, because it has been estimated that 1,050,000,000 tons of scrap iron and steel are now in existence in this country, a practically inexhaustible source of supply for the hungry steel mills, although consumption of scrap iron and steel in the first four months of this year totaled 17,518,000 gross tons, nearly 6,000,000 tons more than in the same period of 1940.  
 In round figures, the value of waste or secondary materials going into the produc-

**SCHREINER INSTITUTE** KERRVILLE, TEXAS  
 A fully equipped and fully accredited high school and junior college for boys. Ideally located in the famous Texas "Hill Country." Three years high school; two years college.  The SCHOOL FOR YOUR BOY

tion of all types of goods from steel to paperboard and rubber tires probably exceeds \$1,000,000,000 a year.

Scrap can be classified in two categories: "home" scrap, produced by a company itself and zealously recaptured by its salvage department, and "purchased" scrap, such as old pots and pans, old paper and worn-out tires, bought by dealers from junkmen and resold to industry.

The scope of this industry is indicated in the following table which lists the average consumption in the past two years of certain important secondary materials.

Material.	Tons.
Scrap iron and steel.....	40,000,000
Waste paper.....	4,000,000
Copper and brass scrap.....	100,000
Scrap rubber.....	250,000
Zinc scrap.....	180,000
Aluminum scrap.....	50,000

Raw rubber has become a focal point in the present emergency. This country depends on the Dutch East Indies for its rubber, and war in that sector may shut off supplies. That is why, at the present time, practically all cargo space in vessels leaving the Orient for this country has been commandeered for rubber. Rubber reclaimers now consume about 250,000 tons of scrap a year, but the supply of scrap could be stepped up to 500,000 tons.

Each industry has its own process for salvaging scrap material. For instance, woolen rags are "carbonized." At one time a scrap dealer had to go over an old suit of clothes and carefully remove the burlap, the cotton and other non-woolen materials. Now the old suit is simply thrown into a vat in which a solution removes all vegetable matter without harming the animal fiber.

Trolley-car tracks or "EI" posts are sheared and tossed into crucibles to be melted down into a hot mass. An old aluminum double-boiler is thrown into a melting pot and the dross or foreign elements skimmed off the top. Waste paper is "cooked" until soluble. By the time the various reclaiming processes are finished, each piece of junk has been rehabilitated as a respectable raw material ready to emerge, after further processing, as a shining airplane wing, a gun barrel, or a giant tractor tire. — New York Times Magazine.

**ADVERTISING**

The question "Who pays for advertising?" has several different answers. If the advertising is poor the advertiser pays for it. If it is good and his competitors' campaigns are poor, said competitors pay for it. If that of the whole industry is good, it pays for itself. The notion that the public pays for it is wrong.

If advertising makes it easier to sell more goods it helps distribute overhead more widely and tends to cut all production and sales costs. Often its own cost is more than offset by these economies. In which case it makes possible lower selling prices—and the public doesn't suffer by that process. If competitors lose sales because of it they are the only ones who suffer—and therefore may be said to pay for it. But if their advertising, too, increases sales and cuts down costs in the same ratio, then the advertising nets a profit all around. When advertising does not help to increase sales and cut down costs, it raises them, of course. But that's just the advertiser's headache. If he ever should try to pass it along to the public he would quickly find his prices out of line with com-

**ALLEN ACADEMY**

BRYAN, TEXAS.

petition—and the public would know all too well just what to do. You can't fool the public all the time. The public knows value.

**\$10,000,000 TOY HOBBY**

About 1,800 miles of railroad trackage in this country will be of no use at all in the defense program. This is the toy trackage operated by miniature-railroad enthusiasts. The most recent estimates put their number at more than 100,000, and their combined systems would reach from New York City to San Antonio, Texas. The investment of these toy hobbyists in equipment is placed at \$10,000,000.

Behold, the Lord's hand is not shortened, that it cannot save; neither his ear heavy, that it cannot hear; but your iniquities have separated between you and your God, and your sins have hid his face from you, that he will not hear. Isa. 59:1, 2.

**INSTITUTE FOR BOYS**

The healthy Hill Country around Kerrville, Texas, has become a great center for recreation and for study. Cool in summer and mild in winter, it offers a climate unequalled in the Southwest for grown-ups who are seeking a playground and for boys and girls who are seeking an education. Schriener Institute at Kerrville, is a fully equipped school and junior college for boys. It teaches engineering, pre-medical, pre-law, teacher-training, business administration and academic courses. Individual attention is given all students and character building is stressed.

**HEN A PACKING PLANT**

The needs of the democracies—particularly Britain—are back of Secretary Wickard's plea that national defense calls for more laying hens and pullets and for better feeding of layers to encourage full production. Also back of it is recognition that the hen is one of the most effective of food processors. What the hen does as a factory is to convert considerable volume of grass and grain into a much smaller volume of better and richer food material. The feed the hen eats goes through the mill in a process of selection and concentration and comes out neatly packaged with white yellow yoke made up of high quality protein with a good allowance of the protective minerals and vitamins.

Cotton can be spun so fine that a pound of it will make 250 miles of yarn, or so strong that it is used for airplane wings, tires, sails, tents, awnings and bagging.

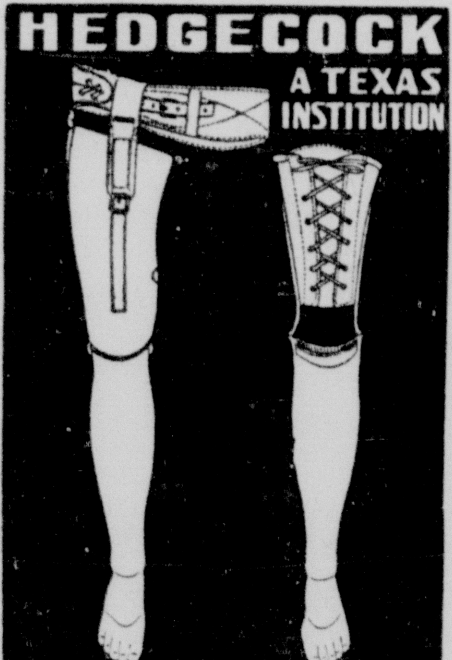

They shall not hurt nor destroy in all my holy mountain; for the earth shall be full of the knowledge of the Lord, as the waters cover the sea. Isa. 11:9.

## BUSY WOMEN'S WORKBASKET

### Chick and Duck Crib Spread

Perhaps this is Chicken Little and Ducky Lucky come to decorate baby's crib spread. Twelve adorable blocks are done in outline and lazy daisy; a colored border and scallops of white finish the spread. The hot iron transfer for stamping is C9324, price 10c. Already stamped on fine white material, the twelve 9-inch blocks are C9324M, price 35c.

Address all letters to Southwest Magazine, Needlecraft Dept., Box 166, Kansas City, Mo.

## FASHIONS TODAY

Late summer is the time we usually find we must do a little extra sewing to brush up on the hard-worn summer wardrobe and begin to plan the things we will wear for winter. Take a little time and you will find designing a most exciting adventure. When "ohs" and "ahs" are acclaimed for your handiwork you will feel much as an artist who surveys his first picture. If you are planning on an adventure in sewing it is well to supply yourself with pinking shears for inside finish and a one-woman skirt marker which will dispose of the necessity of an assistant. Slide fasteners with decorative beads to mark each side, rubber strips or rubber-threaded belting to keep skirts and slacks up and down, nylon thread and modern thimbles to protect long finger nails are concessions to your demand for equipment. Never did sport clothes lend themselves so easily to the home machine as this season. The play-suit either two or three-piece is very easy to begin work on. Modern patterns are so simple and easy to follow that any one can sew well. Once you make one

of these suits you will want to have three or more as they will be inexpensive and a delight to wear. Summer dresses are appealing and whether made at home or bought at the shops they are a delight. We find seer-sucker, eyelet, gingham, voile, chambray and many of the new fabrics give grace and variety to any wardrobe. Lingerie is easy and delightful to make. You may here fulfill your desire for the extreme tailored types or the adorable ruffle and lace creations. There are fine cottons and lovely rayons in many colors from which to choose. And before you change to other tasks consider some of the following suggestive creations: Gold pique evening gown trimmed in lace, a green and white silk print dress with lapels and turn-backs faced with white of the same material as your three-quarter length coat, or a sky-blue organdy evening dress splashed with pale pink roses in small bouquets and finished at neckline and fastened with piquet cutout flowers. There is real joy and economy, too, for the woman who can "sew her own and daughters, too."

## BREAKFAST-TIME WISDOM

Of all the meals served during the day breakfast is the most important. Doctors pretty much agree that mal nutrition, especially with high school students, is due to scanty or no breakfast at all. Most frequently when children refuse to eat breakfast it is because they are constipated or are trying to follow a foolish "fashion" started by some group. In the average family it is twelve to thirteen hours between the evening meal and breakfast. A healthy body at the end of this time should be hungry and alert for food. It is up to mother to see that the breakfast is as attractive as any other meal. The adequate breakfast consists of fruits or fruit juices, cereal, egg or bacon, hot bread or toast and a drink, such as milk, cocoa or cereal beverages for children and coffee for adults. It takes a little more planning to have a different breakfast than it does other meals,

but with a little forethought this can be accomplished. Cereal, for instance, can be served either hot or cold. There are many types of cereal. It is well to remember it is not the heat in the cereal that gives the nourishment, but the grain from which the cereal is made. Whole-grain cereals are to be preferred over the others. The addition of fresh fruit in season adds vitamins and new taste appeal. Don't forget that brown sugar or honey make sweeteners that are a change from white sugar and contain many essential food elements. The use of honey for breakfast is a golden opportunity for introducing a welcome variation in the breakfast menu. It goes without saying that honey will receive a warm welcome as a delicious adjunct to the breakfast menu. The sugar of honey is a pure, natural sugar, a builder food packed with iron and other vital minerals.

## HOME BAKING

Though the oldest of arts is "cooking," we are finding new and better ways of doing it. Science has made rapid strides in acquainting women of the "why and wherefore" of the business of cooking. The Consumers Service Department of General Foods, Inc., has recently published some new information about baking that will be taken up in detail next month on this page. They have taken as their slogan, "there is never a good that may not become better."

Briefly some of the changes suggested and explained are:

1. Changes where experience has shown such changes give a more moist, delicate cake.
2. Some changes where eggs are added separately with yolks added unbeaten and whites beaten.
3. Egg whites no longer stiffly beaten and folded in, but beaten until they will hold up in moist peaks and stirred quickly into batter.
4. Basic principal of angel food cake will be explained.

Watch for this article next month.—Editor.

## WE DINE

Here are some recipes that should sharpen the most jaded appetite:

- Honey Bran Muffins**
- 1 1/4 cups sifted flour
  - 1 1/2 teaspoons baking powder
  - 1/2 teaspoon soda
  - 1/2 teaspoon salt
  - 4 tablespoons honey
  - 3/4 cup sour milk or buttermilk
  - 1 egg, well beaten
  - 3 tablespoons melted butter or other shortening
  - 1 cup bran flake.

**Stuffed Pepper**

Select, cut tops off 6 green peppers, remove membrane and wash thoroughly. Stuff with the following mixture:

- 2 cups cooked meat (ground)
  - 2 tablespoons grated onions
  - 1/2 cup mashed potatoes
  - 1/2 teaspoon Worcestershire sauce
  - 1/2 teaspoon salt
  - 1/2 cup catsup
  - 1 1/2 cups gravy or soup stock
  - 1/2 cup grated cheese
  - Paprika.
- Grind meat, add onion, potato and seasoning, then add enough gravy or thickened soup stock to moisten. Arrange in baking dish covered with tomato juice or canned tomatoes, bake in slow oven (350 F.) for 45 minutes. Just before ready to serve sprinkle with grated cheese and paprika, melt cheese and serve piping hot.

Mercerized cotton is named after John Mercer who discovered that cotton could be made stronger and more lustrous by treating it with caustic soda.

**Smiling... WITH  
Admiration  
Happiness Girls**

"A wise husband is one who buys his wife such fine china she won't trust him to wash the dishes."

PEP

VITALITY

... and  
**HERE'S A HAPPY TIP FOR YOU**

When the heat's on... refresh yourself with a sparkling and frosty glass of either ADMIRATION Coffee or Tea iced.

Famous the South-over for its rich and mellow flavor, ADMIRATION Coffee iced helps maintain the vitality that is so necessary to you on warm days.

ADMIRATION Tea is prepared only from young, tender and full-flavored tea leaves, giving you a delicious summer beverage unexcelled for restoring pep.

**Serve... REFRESHING  
Admiration  
ICED COFFEE and TEA**

## STATUE OF LIBERTY

So far this year the month by month totals of those who make the trip to Bedloe's Island, New York harbor, to get a close up view of the Statue of Liberty are 66 per cent higher than the figures for the same months of last year. It is believed that before the year is out more than 500,000 persons will have sailed from the Battery to stand beneath this huge structure of stone and girders and copper plate and, perhaps, draw renewed strength to face a troubled world.

Last year 395,600 visited the Statue and the year before that 248,900. Those earlier crowds were carefree sightseers, school children and tourists from many States, who gayly laughed and chattered on the boat coming over, strained their necks to peer at Liberty's torch, 151 feet up, rode the elevators up through the base and climbed the 168 steps to the crown. Now, the attendants say, things are different. The crowds are bigger but quieter. There is still much chattering when the boat leaves the Battery, but on the island the people are liable to talk in hushed tones. Somebody always mentions that Liberty Statue was made in France and presented to the American people by the French people who have lost most of their liberty since Hitler conquered the country.

## HIGH EXPLOSIVE SHELLS

The greatly increased production of high explosives is probably one of the most gruesome aspects of modern war. Records show that soldiers who are wounded by shellfire have double the fatality rate of those who are struck by rifle or small-arms ammunition. Artillery shells during the World War I accounted for seven out of every ten gunfire casualties, whereas, during the American Civil War, only one out of every ten was wounded by heavy explosives.

The shell is probably as deadly a bit of mechanism as man can devise. Even its manufacture is so dangerous that its various parts are made in widely separated factories to insure against any series of plant explosions. The noise of grinding and finishing the shell case is so great that one plant in England is reported to be using only deaf persons to do this work. In factories where the powder is made and packed none may enter who does not wear special rubber boots and clothes. Rough fabrics that could cause friction are barred.

## 1,000 USES FOR COTTON

Cotton is now used in more than 1,000 ways and its uses are constantly expanding. The annual consumption of lint cotton for each citizen of the United States has been about 26 pounds for the past several years. Of this amount, clothing accounts for some 40 per cent, and 20 per cent of the consumption is utilized in household goods. The remaining 40 per cent goes into so-called industrial uses.

## THIS OUTSIDE IDEAL WOODWORK IS Right!

**DECORATIVE BLINDS.** Quickly installed and adds a remarkable touch of distinction. Stationary slats, motion and tensioned construction. Entire slat construction OR with decorative upper panel shown above. Choice of 15 panel designs shown below.

**SCREENS.** Finest selected Western Ponderosa Pine Machine-sanded on both sides. Hardwood dowel construction which makes them practically sag proof. They can take all kinds of weather and hard usage.

**VENTILATING LOUVERS.** Keep the air constantly circulating through the attic and prevent the concentrated accumulation of heat which otherwise radiates day and night throughout the house. Built to prevent rain entering and can be easily closed in winter.

## ALL PRESERVATIVE TREATED "BY THE IDEAL METHOD"

All the IDEAL outside woodwork is preservative treated by complete immersion with time control and NOT just by "end dipping."

"The IDEAL Method" means or exceeds the rigid standard of The National Door Manufacturers Association and is branded with the seal of approval shown below for your protection.

## ROOSEVELT AND CHURCHILL MEET

### CAPERTON ANNOUNCES FOR SEAT IN HOUSE

In asking the people of Milam County to vote for me to be their Representative, I place before them the record of my life with them for the last 19 years. I came from Bell County to Milam County and started selling Raleigh products to the people in the rural sections in 1922. I have followed this one occupation continuously since that time. In 1925 I was ordained as a minister in the Baptist Church and have served the rural churches in this County and the church of my birthplace, where I am full-time pastor, continuously since that date.

I do not have a college education nor am I a lawyer, but I am hoping that my life with the people of Milam County will prove to them that I have sufficient judgment to administer their public affairs in Austin. My hope is that the people with whom I have lived will say "You who have been faithful in little things shall be given an opportunity to be faithful in much."

I realize the problems of the farmers because I was raised on a farm and have been in constant daily contact with the people on the farms ever since. I am familiar with some of the problems that confront businessmen because I have been in a

(Continued on page 4)

### Dry Rally Called For Friday Night

A Dry Rally has been called for Friday night at 8 o'clock in the District Court Room, it was announced here Wednesday by Rev. C. W. Sanders, pastor First Baptist Church.

Friends of the dry cause will meet, he said, to organize and to hear Jeff Davis, executive secretary of the Texas Drys.

"The above picture is from Family Affair, a talking picture which will be shown free to everyone. See Joe Morgan as he returns saved from drink to be united with his family and especially with little Mary."

"Every preacher, lawyer, doctor, Clerk, business man, in fact all are urged to be present," said Rev. Sanders. The court room will have fans in it and will be exceptionally comfortable.

Mrs. M. A. Hearne and two sons, Martin and Jack, are visiting her daughter Mrs. I. M. Baker for the next two weeks in McAllen.

Jimmy Angell is able to be at work today after a toe operation.

Mrs. J. C. Herring of Burlington is visiting in Cameron today.

### 2400 Lbs. Aluminum Collected Here

Twenty-four hundred pounds of aluminum was delivered Sunday morning to Austin by Grady Little.

This aluminum was collected under the supervision of Mr. Little who was chairman of the drive, a part of the work of the Local Defense Council.

The aluminum was collected in a pen on the Court House Lawn and will be taken over by the United States government for the manufacture of air planes.

#### ON VACATION

August Gurecky, assistant cashier at the First National Bank, and Mrs. Gurecky and daughter, Barbara Jane, have left the city for a two week's vacation trip which will take them through several states.

They expect to return next week. Mrs. Gurecky is in the office of Dr. Arent.

### MILANO BURGLAR TAKEN

WAS RELEASED FROM  
JAIL WITHOUT TRIAL

#### CONFESSES

J. W. Carter, arrested late Saturday, made a confession in which he admitted burglaries in the Milam community it was announced shortly after 3 p. m. by Deputy Sheriff LeRoy Massengale.

\*\*\*\*\*

J. W. Carter was arrested in Rockdale late Saturday by Deputy Sheriff Carl Black.

According to the Sheriff's office Carter is being held on charges of burglary.

Carter, when arrested, was in the city park at Rockdale. He offered no resistance. He will be charged in two cases of burglary it was said by Deputy Sheriff LeRoy Massengale, who said that Carter had been terrorizing people in and around Milam by breaking into their homes.

Citizens of that community called the office of the Sheriff and officers began a search for Carter because he was already under suspicion. Carter is said to have stolen two pistols and a rifle from Milam homes. Mr. Massengale said that Carter had been living near Milam for several months and was believed to have existed on stolen chickens and watermelons while sleeping in the

woods near that city. He was a former employee of the railroad company at Milam.

Carter was arrested in Cameron by City Marshal Gene Smith on suspicion of burglarizing homes in this City, but he was never tried.

A complaint was filed against Carter for obtaining money by subscription for a sick man in Cameron whose family paid Carter for his services. When this was discovered the family gave notice through the Daily Herald that he was unauthorized to solicit such funds. City Marshal Gene Smith confiscated his subscription list and ordered him to leave town. Later he was arrested in Rockdale for the same offense. Carter spent several days in jail but no trial was ever held.

He got better than a suspended sentence because he was released without punishment and has been able to pursue his thievery. If he had been given a suspended sentence his conviction now would automatically put him in prison. If he is given a suspended sentence now he can return to his profession.

Milam county juries are noted for their sympathetic understanding of the embarrassment which overtakes a thief or a kidnapper when discovered in his crime.

Carter is in the Milam county jail and his case is awaiting action of the Grand Jury.

### Ernest Sharpe Tells About His Projected Trip To Moscow; Cameron Enjoys Story of Interesting Journey Begun in Lisbon; With Diplomatic Corps

The "Rapido" was scheduled to leave for Madrid at 4.40, and at 4.35 the taxi driver and I were madly driving down the main business street of Lisbon toward the station. That was June 20, and what a day! I'll never forget it. Although I had been preparing to depart for Moscow for two months, I had to do a thousand things at the last minute and tell fifteen hundred people goodbye. When I got to the station I had exactly four minutes to check three suitcases, a big duffel bag, and a small trunk, run up three flights of stairs, find out which was the train for Madrid, and board it.

How I got the porters to hurry enough to get the luggage on the train, I don't know, but it got there. I didn't have any trouble picking out the train for Madrid because it was already whistling the last call. I paid the porters by handing the money out the train window. This was a great start for my trip to Moscow.

I took solemn oath to go to stations one hour ahead of time thereafter. I found later on that an hour was hardly enough, especially traveling in Europe these days.

My companions for the trip, at least part of the way, were Bill Henderson, assigned like myself to do code work at the American Embassy at Moscow, Bill Doyle, a diplomatic courier on the Lisbon-Bern run, and Ray Leddy, a diplomatic courier on the Lisbon-Madrid-Tangier run.

After the train was well under way, the four of us settled down to a game of cards and some beer in the diner. But the changing scenery mainly occupied my attention. Small white-plastered farm houses with red tile roofs tucked away here and there in a grape vineyard or an olive grove or a meticulously cultivated vegetable garden were pretty to see.

### Approaching Marriage of Miss Doris Laake To Dean White Is Announced At Party Here Friday

The approaching marriage of Miss Doris Laake to Dean White was announced Friday evening by Mrs. Paul Laake, Jr., at a forty-two party in the Laake home.

Miss Laake and Mr. White will be married on Sunday, August 24th. The appointments for the party were beautiful and forty-two prizes were won by Mrs. Alvin Mondrik, Lanelle Matula, and Mrs. Jim McLean.

Plate favors were small umbrellas, each tagged on which was written "Doris and Dean, August 24th." A salad plate and punch was served and all reported an enjoyable evening.

### George Mayo Newton Runs For House

George Mayo Newton, former member of the House of Representatives in Austin will be a candidate to succeed Reese Turner who recently resigned.

Mr. Newton expects to make his announcement within the next two or three days and will file his name for the ballot on Friday.

He has been engaged with government work in Dallas for more than a year.

Mr. Newton will issue a formal platform on which he expects to go before the people and ask for their support.

Telephone your News items to 282.

### Marak Church First To Report USO Fund

The Church of St. Cyril-Methodius, Catholic, at Marak, is the first to report funds for the United Service Organization.

Mr. Tomek said the collection was taken at a service and no special effort was made. The Marak church members being the first to contribute have officially opened the drive in Milam county.

The Marak community leads over other community in the county in the number of men in service. More than 20 young men from that community are now in the service and most if not all are volunteers.

Advertise in the Daily Herald.

### FRANK CHEEVES HEAD COTTON INDUSTRY COM.

Acting in co-operation with the Cotton Producing Industry and the Surplus Marketing Administration, U. S. Department of Agriculture in an effort to increase our home consumption of 100% American grown, processed, and manufactured cotton products, Frank Cheeves, Chairman of the Milam County Cotton Industry Committee, revealed today that existing personal inventories of cotton goods are barely sufficient to permit one change of wearing apparel and household cottons per week.

Mr. Cheeves said that although the United States is regarded as the cleanest nation in the world, this country could better its record substantially by increased purchases of cotton articles.

The wardrobe of the average man is estimated to include 2.62 dress shirts, 2.46 suits of underwear and 2 pairs of pajamas. The average laborer possesses 1.50 pairs of overalls, 1.50 pairs of work pants, and 1.25 work shirts. In the average family there are 4 sheets, 4 pillow cases and 8 towels.

"Naturally these figures are for the average man and family, and cannot be taken to hold good in every case," Mr. Cheeves said. "We must remember that some families have substantially higher cotton inventories than the national average. By the same token some families' inventories are very much under the average."

"With such a vast quantity of cotton articles readily available to the American consumer at reasonable prices, we should all take advantage of the opportunity to increase our supplies of cotton goods, not only to aid the eleven million Americans directly dependent upon cotton for a livelihood, but to benefit ourselves as well."

"I do not think that there is anyone who will not agree that the best pick-up for a good day's work is a refreshing bath and a change to cool, clean cotton garments," Mr. Cheeves continued. "Everyone can take advantage of this number one pick-up if he will increase his wardrobe of cotton shirts, trousers, underwear, socks and work clothes."

### Irvin McKinzie Held As Robbery Suspect; Is Named by Carter

Irvin McKinzie was placed in jail here Wednesday by City Marshal Gene Smith in connection with Cameron robberies in which J. W. Carter was involved.

Carter in a statement to Mr. Smith said that he had an accomplice and named McKinzie. The marshal has been working on the case for some time, believing that McKinzie was involved.

Mrs. J. W. Carter, former wife of J. W. Carter, made a statement to City Marshal Smith accusing McKinzie as a partner of Carter in a number of burglaries.

One robbery mentioned was that of the J. L. Barmore home in which a valuable gold watch owned by Mr. Barmore was stolen along with money. Mrs. Carter told the marshal that Carter took the money and McKinzie took the watch.

Carter was arrested last week by Deputy Sheriff Carl Black in Rockdale on a charge of robberies at Milam to which he has confessed. Carter also has detailed his robberies in Cameron.

Mr. Smith is working on the case and hoped to submit additional evidence for the September term of the grand jury.

"I had every reason to believe that McKinzie was involved with Carter and I was determined to develop the facts," said Mr. Smith.

#### LUNCHEON FOR BRIDE

Miss Norma Jean McElwath honored Mr. and Mrs. Jack Wallace, the former Miss Lucy Turner of this city, with a luncheon Sunday at her home.

Those present were the Honorees, Mr. and Mrs. Jack Wallace, Charlotte Stidham, Jack Walters, Mary Ellen Cottle, Douglas Perrin, Leonard Hooper and John Henry Wilson.

## MAKE JOINT DECLARATION ON NEW WORLD AFTER WAR

### TWO HURT WHEN CAR CRASHES TRUCK

Curtis Duncan was severely injured and Archie Shuffield sustained a broken nose with lacerations as the result of an early morning auto crash near Minerva.

Duncan was taken to the Cameron hospital with a badly broken right leg, but was reported to be doing well. Shuffield was thrown through the windshield of the car and his nose was slit and he was treated by a local doctor early this morning.

Shuffield said that the Ford pickup in which he and Duncan were riding struck a parked truck which was standing on the road without lights.

Jim Hawk, owner of the truck, was attempting to get the machine started when the crash occurred. He held a flash light and tried to avert the crash, but the machine driven by Duncan and Shuffield crashed the truck as Hawk

### Dry Leaders Plan Big Rally Sunday Night at Church Here

The Baptist, Methodist, Presbyterian and Christian churches are meeting in a big united Christian Temperance Service Sunday night. Other churches have not been contacted as yet but will be invited to meet with us. People something must be done, when headlines read, Man Shot at Tavern, Drunken Driver Runs 9muck, Officers Called to Quell Disturbance in Tavern.

Everyone knows that there are more places in Cameron to buy liquor than there are places of worship. Statistics show that there are in U. S. 436,990 places to buy liquor, 1 place for every 299 persons, or 1 for every 73 families. On the other hand, there are 210,000 churches, 1 for every 619 persons or 1 for every 151 families. More than Twice as Many Saloons as Churches! Why is this, Preachers, and the public leadership has played "shut-mouth" and Christians have been on a "sitdown strike on this issue. Lets unfold and speak out!"

"The Beneficent Reprobate" will be shown, and Jeff Davis will speak on "The Responsibility of the Dry Citizenship."

Arrangements are being made to make the Methodist Auditorium one of the coolest places in Cameron Sunday night, come and see the Dry Crusade take off to a good start!

C. E. ARCHER.

#### ACCEPTS PLACE AT BAYLOR

Many friends in Cameron will be interested in knowing that Miss Willie Mae Kelley, instructor in Mary Hardin-Baylor College, at Belton, recently received her Masters Degree from the Cincinnati Conservatory of Music this summer. She gave her Masters recital, which was one of the best ever given in Cincinnati. She has been commissioned to write piano accompaniments for a book of folk-songs, in collaboration with the University of Texas Folklore Department. This book will be published this coming year.

Miss Mary Louise Beltz, took part in contest sponsored by National Federated Music Club, and won first place in the contest, receiving as one of the prizes, the opportunity to make a concert tour to be arranged by the club.

Misses Kelley and Beltz presented a program last spring here in Cameron for the annual program given by the Cameron Symphony Club, and will probably make a return visit to Cameron this fall.

Amiel J. Moerbe of Thorndale transacted business in Cameron Wednesday.

John Longmire of San Saba was a visitor in Cameron Monday.

### PRESIDENT ROOSEVELT AND CHURCHILL MEET

President Roosevelt, representing the government of the United States and Winston Churchill, representing the British Empire had met today and issued jointly a new declaration of independence for all the oppressed people of the earth.

This unprecedented meeting and declaration occurred some where in the waters of the North Atlantic ocean.

Announcements were made simultaneously in London and Washington and a full text of the eight point declaration of policy was released to the world.

In brief, the agreement states that neither country desires the territory of any other country; that after the war is over all peoples will have an opportunity to select the government under which they desire to live; that the freedom of the seas will be a universal policy in the world; that peoples throughout the world will have social security; that the peoples of the earth will be freed from the burdens of armaments.

The declaration is believed to mean a projected new deal for the world and was issued in anticipation of a peace offer soon to be made by Adolf Hitler. Both countries are pledged to the destruction of totalitarianism. No aggressor nation was named.

The joint agreement between the two countries was said to be an after war consideration. No mention was made of any plan to defeat Germany or how aggression would be driven from the world or democracies would gain a victory.

The conference which was held aboard an American warship was attended by high dignitaries of the British government including Lord Beaverbrook who is on his way to the United States. Harry Hopkins, personal representative of the President was also present as well as other American officials.

Referred to as the worst kept secret in the history of the world the conference was speculated upon in all countries while being denied both in London and in Washington.

President Roosevelt who had not been heard of for four days was reported to be on his way back to Washington where he will find that the Congress has taken a thirty day vacation for the first time since 1933.

### RUSSIANS COLLAPSE IN ODESSA AREA

While President Roosevelt and Winston Churchill were planning a new world order to come after victory over Hitler the armies of Soviet Russia were in immediate danger of collapse in the Ukraine and Hitler's march to the Black Sea was the first major victory in the Russian campaign.

The Russians have admitted the loss of Smolensk although fighting still goes on in that area.

In the far East there were no developments to warrant belief that Japan might make an immediate move to occupy Thailand, but an early show down was forecast.

Air war will soon be raging over Britain again as the Germans were beginning to turn their attention to the war in the West. Russian and British planes continued to carry out heavy raids over Germany.

#### PURSE IS RETURNED

Mrs. Ernest Hess was fortunate today when a purse containing \$35 in money was returned to her at 10 a. m. Saturday. The purse was lost on the street near the Safeway store early Friday.

Clara Matula and Mr. and Mrs. Herman Boedeker visited in Temple Sunday.

A small investment will put a man in possession of plenty of good clothes.

What a chance is this for man whose longing for good clothes, is bigger than his pocketbook. He can, at last, have something really fine for a small amount.

## NEWS FROM MILANO

Milano territory has had some good showers lately that was needed for fall tomatoes, sweet potatoes and gardens.

Mrs. Nannie Bodiferd and grand son, Jack Bodiferd, Mrs. Nellie Lankford and daughter, Francis of Dallas and Mrs. Amanda Woolley of Cameron were guests last week in the home of Misses Kate and Alice Brennan.

Mrs. Chas. Martin has returned home from San Diego, Calif., where she spent a month with her daughter, Mr. and Mrs. Carroll Saltee. She visited places of interest while there and made a trip into Old Mexico that she enjoyed very much. Her daughter underwent a serious operation while she was there, but was improving nicely when she left.

Fred Brannon is in Houston with his brother Tom. From Houston they will go to Galveston for the benefit of his brother's health that has been bad for over a year.

Miss Anna Mosely left Tuesday for Cameron where she will do NYA work.

Mr. and Mrs. Shaw of Gause visited Miss Lila Thomas one day last week. Mr. and Mrs. Shaw are moving to Lubbock.

Mrs. W. E. Thomas returned home Thursday from a two week's visit in Arkansas, Oklahoma and Louisiana. She went with a crowd of relatives. They went in cars and reported a wonderful trip.

Mr. and Mrs. W. F. Hooker and boys, Jewell and Frank have returned home after a pleasant three weeks visit with their daughter and husband Mr. and Mrs. Allie Landtrip in West Texas. They reported Mr. and Mrs. Landtrip in the best of health and doing nicely in their new work.

Visitors in the home of Mr. and Mrs. Asa McGregor last week were Mrs. Carl McKnight and son Gerald of Caldwell, Wendell, Francis and Patsy Kirk of Rockdale, also their son, Clifford, who spent his vacation of fifteen days here with them. He is employed in Galveston with the U. S. Marine Hospital and is very much interested in his work.

Mr. and Mrs. Howard Manley and daughters, Joyce and Shirley of Temple were Sunday guests of their mother, Mrs. Dan Robinson. They all returned home except Joyce who remained over for a longer visit with her grand mother.

Mrs. Will Hensley left Saturday with her brother, Nelson, for a visit in his home at Engleside.

We are glad to report that Mrs. Bedeker is improving. She has had typhoid fever for five weeks or more. She is at the home of her daughter, Mrs. L. E. Love. She also was in the Temple hospital for three weeks.

One of the School busses left Saturday morning for a trip to Galveston. The bus was driven by George Harold Beard and some 35 or 40 made the trip.

Mrs. Fred Bramon left last week for New York where she will spend considerable time in the home of Mr. and Mrs. Jack Bramon.

Mrs. Milton Pierce happened to a painful and serious accident Monday night when she came in contact with an electric fan. She got up in the night to lower the windows because of rain and did not know fan had been turned on. She got two fingers cut very badly.

## Sharp Superintendent Released From Job

A. C. Dunn, superintendent of schools at Sharp, has been released from his duties by the school board of that district.

Although no details were available, the announcement was made at a meeting of the county board here last week. Dunn, it was understood, still holds a contract with the board but will not be actively engaged as superintendent.

Bad feeling in the community has existed for several years, starting under Superintendent Middleton over an election and other disagreements. Dunn succeeded Middleton.

Some time ago Dunn was brought to a local hospital suffering from knife wounds inflicted by Guayford Gersbach, 15 year old student. It was reported at the time that Dunn had knocked the boy down, or struck him and the youth stabbed the superintendent.

Charges were filed against the boy but no trial has been held.

## GERMAN LOSSES ARE APPALLING SAYS REPORT

The bloodiest battle in all history was still undecided today as the vast armies of Germany and Russia fought bitterly and with appalling loss in human life all along the great front.

The Germans are advancing slowly in the Ukraine and are said to be within one hundred and fifty miles of Odessa, the Black Sea Port.

The Germans have launched their third big drive but have suffered a set back at Smolensk and have made no progress on the Central Front.

The Germans are said to be losing hundreds and thousands of men in futile assaults upon the Russian positions. More blood has been shed in the Smolensk area than in any other battle in human history, report said.

The battle fields are covered with the bodies of dead Germans and Russians and it was believed that it would be beyond human endurance for Germany to continue to fight under such conditions with such terrific losses.

The Russians, in co-operation with the British, and both using American made bombers, have carried out extensive raids on the Reich.

In France the armed forces have been placed under command of Admiral Darlan who is opposed to the British and favors collaboration with Germany.

The British government again has warned Japan against any threat to Singapore. Meanwhile, Thailand continues to mobilize her army.

Washington was stagnated as usual. It was believed a vote would be taken sometime late Tuesday on the proposal to keep draftees in the army for more than one year.

Charlotte Stidham, Jack Walter and Leonard Hooper of Houston visited friends in Cameron Sunday.

Mrs. Del Samples is visiting her daughters in Fort Worth for a few weeks.

Aubrey Nevins, Warren Rush and Donald Hart of Fort Normale visited friends in Cameron over the week end.

## Gersbach Case is Postponed; No Jury For Week is Cause

The case against Guayford Gersbach, 15 year old Sharp high school boy who stabbed Supt. A. C. Dunn with a knife, will not be tried here Monday.

Council for defense, Camp & Camp have raised the question of jury selection. No jury was provided for in the month of August when the jury commission met at the beginning of the term.

As understood by The Herald the law provides a defendant must be tried by a venire drawn for the week by the commission. Trials of cases in August have not been the rule in this court.

When the jury commission meets for the September term of court juries will be drawn for the month of September and October as provided by law and during this term, the Gersbach case will be tried.

The case was scheduled to be brought to trial Monday but has been continued to the September term.

Mrs. Cecil Warner of Fort Smith, Ark. who has been visiting her mother, Mrs. S. W. Cheeves, left Saturday for her home.

The Westward Course of the Empire—  
they wanted LAND...

Cramped quarters were not for the men who won our country. The crowding of the East drove them toward the West, where a man could breathe—it was the LAND that they wanted! This spirit of adventure that drove the pioneers to the unexplored and perilous West is the same spirit that later spurred men to make America a power in the affairs of the world—but LAND was what they needed first!

## Land is Wealth

You need LAND for that feeling of solid security, land that you know is yours, will always be yours! Invest your savings in land and you'll know that your investment is safe, always! In this region there is ample opportunity for profitable investments.

SHARPE

(Continued from page 1)

The most impressive sight of the Portuguese landscape was an old fortress castle. We were riding parallel to the River Tagus, looking down at the broad river from a considerable height. As we rounded a bend, into view came this old gray-walled castle on an island in the middle of the stream. What a picture! I could almost see soldiers in helmets and breast-plates and coats of mail standing guard in the turrets and patrolling the parapets. One of the couriers told me the castle was built there eight or nine hundred years ago and was one of the first strongholds the Portuguese constructed in their overthrow of the Moors.

Customs inspection at the Portuguese frontier was handled quickly. Then we crossed the border to Valencia, Spain, and prepared to meet a stiff examination from the Spanish. We had been told that they might search even in the shoes we were wearing for Spanish pesetas. No one is allowed to bring pesetas into Spain. Henderson and I were together standing by our baggage. In trying to look innocent of any smuggling we probably looked as if we had a bag full of "hot" money. Three officials in uniform came up. One of them asked a question in Spanish. Henderson didn't know a single word of Spanish, and I speak the language about like Mr. Mose Cox, of Cameron, Texas, who always says "Buenos dias, hombre" meaning "good morning, sir," but which translates "Good God, man." I understood the official to ask us where we were going. I told him that both of us were going to Russia; at least, that's what I thought I told him. The three Spanish officials began to jabber among themselves, then turned on us with a mean gleam in their eyes, and shot another question. One of them started opening the luggage "conmucho gusto." We knew something was wrong, but couldn't guess what. Just at that moment Ray Leddy came over and began to talk to the chief official. Ray explained something to him. The chief laughed, made an apology, and told his men to pass our baggage without inspection. After they had passed on, Ray explained that I had told the chief that Henderson and I were Russians. He said this was worse than waving a red flag in front of a Spanish bull and they were just about to "give us the works." Ray told the chief we were "Americanos" and were going to Germany. "The word Germany works like magic among Spanish officials," he said.

After spending an hour and a half walking around the station, watching the soldiers in a motley collection of uniforms, looking in the bar and observing the Spanish custom of drinking from the spout of a jug without touching the spout, wondering if the Spaniards were as curious about me as I was about them,—after all this and considerable more, I got back to the train, and we were soon on the way to Madrid. It was close to midnight, and I turned in.

(Continued Next Week)

Miss Echo Idea Daniels who has been laboratory technician at the Cameron hospital for some time, has resigned and has accepted a like position with the Jefferson hospital at Birmingham, Ala. Her mother Mrs. Ada Daniels who has been with the Belton hospital, has resigned and will leave there soon to be with her daughter at Birmingham.

McFARLAND-RICHARDS

Earl McFarland of Marlow and Helen Richards of Cameron were quietly married at 3 p. m. Saturday at the beautiful Marlow Baptist Church. Rev. Layne L. Caldwell, pastor of the church, had charge of the ceremony.

The Herald joins their many friends in wishing them a very happy and successful married life.

**Girl Triumphs Over 141 Day Coma; Will Soon Be Normal**

Lavina Provazek, 15 year old El Centro High School student in California, who was critically injured in an automobile crash, has triumphed over a coma which lasted for 141 days.

Readers of the Herald will recall that a story was printed concerning Lavina some time ago. She was injured on January 5th, while riding in the San Diego mountains with other students.

For months Lavina was unable to move a muscle. An operation was performed to remove pressure from the brain and now she can do everything a normal person can do with the exception of talking.

Her physician said she will be restored to normal within a short time.

She is the daughter of Mr. and Mrs. John Provazek who formerly lived in Cameron. He is a world war veteran. The mother of the girl is a sister to Mrs. Jimmy Marek at the Laake Drug Store in Santa Fe Town.

Louie Watson of Rockdale was in Cameron on Wednesday.

**STOP THAT ITCHING**

If bothered by the itching of Athlete's Foot, Eczema, Itch, Ringworm or aching feet any drug store will sell you a jar of Black Hawk Ointment on a guarantee. Price 50c and \$1.

**Needy Blind May Now File For Aid**

Applications from the needy blind can be filed on Monday, August 11, it was announced here today.

Blind persons may contact the State Department's local Office for application blanks. Aid to the blind is made possible under recent appropriations by the legislature for the State Department of Public Welfare.

Medical examination will be made to determine the degree of blindness before they can qualify.

This announcement will be welcome news to a number of blind in Milam county who are now entitled to aid under the law. Applicants must be 21 years old or over and must have lived in Texas for the past year. They must also be in need of financial assistance and must be a citizen of the United States.

**CARD OF THANKS**

We wish to express our sincere appreciation to our many friends who assisted us during the recent illness and death of our beloved father and husband. We thank those for the floral offerings and also the Coleman Funeral Home.

**Highway Funds for New Bridge Allotted**

The State Highway Commission allotted \$400,000 for a new bridge across Little River and \$28,000 to complete surfacing of Highway 190 from Watts Switch to Maysfield.

The new bridge was announced some time ago by Senator Kyle Vick and the amount of money involved was believed to be something over \$400,000.

While no specifications have been announced it is believed the construction will include a trestle above flood waters across the river bottom. Otherwise the bridge would not provide uninterrupted traffic in times of high water.

The highway from Watts Switch to Maysfield is 190. This road connects with the Brazos Bridge at Port Sullivan and runs into Hearne. The importance of this road was stressed over Highways 77 and 36. The error was discovered too late.

No provisions were made by the Commission for Highway 77 and 56 through Cameron and Milam county. Some resurfacing is being done on Highway 77 between Cameron and Burlington but otherwise the highway is a pie crust monument to complacency in Milam county. Cameron is now cut off from

traffic and business is suffering as a result. A delegation of business men who have the entire city at interest is suggested to go to the Highway Department and lay the case of our neglect before the commission.

**Camp-Baskin Moving Offices to Location In Kestenbaum Bldg**

Insurance offices of Camp-Baskin will be moved to the Kestenbaum building formerly occupied by the Patillo Grocery.

With the moving also go the law offices of Camp & Camp.

The building is being made ready for the new tenants and will be occupied next week if possible.

The offices have been located in the Reno building but additional quarters are necessary for the expanding business.

Walter Cooper of Maysfield was a Cameron business visitor Saturday.

Mr. and Mrs. Tommie Choate of Brenham were Cameron visitors Thursday.

A. A. McVoy was a Cameron business visitor Tuesday.

## Jail Escapee Here In 1940 Returned By Sheriff White

Sheriff Valter White returned late Monday from Mexia where he placed under arrest Jose Galarza, Mexican who escaped jail in Cameron on the night of December 31st, 1940.

The escape here was on the last day R. M. Kennedy served as Sheriff, and one of a number of jail breaks during his time.

Sheriff White placed the Mexican under arrest when he found him working with a section gang on the railroad.

Sheriff White had been searching for this Mexican for a long time and finally located him in Mexia. He is charged in two cases of robbery and under indictment. One of the cases is for the robbery of the Mitchan Garage in Santa Fe Town, and the other charge involves burglary of a Mexican home.

Galarza was being tried Tuesday before the court. Sheriff White has done a good job in bringing Galarza to justice.

### MISSIONARIES TO SPEAK

Two missionaries, Mr. and Mrs. Wagner, who live in South America will speak tonight at A. J. Frisby's Gospel Tabernacle and will show picture slides illustrating their work as missionaries in South America.

The program will get under way at 8 p. m.

## Defense Council is Backing USO Drive

The United Service Organization, to raise standards of social activity for soldiers in the army, has been launched in Milam County through the Defense Council.

W. C. Weise is chairman and will head the drive and has announced committee chairman for every precinct in the county.

The Defense Council met Monday night in District Court Room with Emory B. Camp, chairman presiding. The council plans defense meetings in the various communities of the county.

The Council discussed an air watch system for the county and volunteers will be asked for in the near future.

Julian (Man) Arnold of Fort Bragg, North Carolina, is home on a thirty day furlough visiting his parents Dr. and Mrs. J. E. Arnold at Cameron. This is Man's first time home since volunteering for service about 15 months ago.

Grady Baskin, Myrtle Stidham, Johnnie Mae Hayes, Clara Baskin and Ella Bess Haygood visited in Austin Sunday.

R. K. Connely of Lexington was a Cameron guest visitor Saturday.

Sam Tyson underwent an appendix operation in the local hospital Monday morning and thus far his condition is not serious.

## Cameron People Go To Family Reunion In South West, Mo

Mr. and Mrs. Milton Falkner and Miss Bertie Lee Falkner of Las Cruces, New Mexico returned Sunday from a weeks vacation to South West City, Mo., Oklahoma City, Okla., and several points in Arkansas. They also visited the "Will Rogers Memorial" in Claremore, Oklahoma.

While in South West City, Mo., they attended a family reunion of the Falkner family at the home of Mrs. C. J. Nyander, a sister of Milton and Bertie Lee Falkner. It was the first time in eleven years so many of the family were together, all being present except one brother, W. M. Falkner of Burlington. Those present were: Mr. and Mrs. Guy Falkner of Bethany, Okla.; Mr. and Mrs. James Davis and children of Mineral Ridge, Ohio, and a friend of Davis' also from Mineral Ridge; W. A. Falkner of New Baden, Texas; Mr. and Mrs. Milton Falkner of Cameron; Miss Bertie Falkner of Las Cruces, New Mexico; Homer Lewis Landers, a nephew and his grand parents, Mr. and Mrs. W. A. Landers and Mr. and Mrs. Jake Landers of Osawatomie, Kansas.

Rufus K. Connely a former teacher in Yoe High School and now of Giddings, transacted business in Cameron Saturday.

Telephone the news to 282.

## FUNERAL SERVICES FOR CLAUDE LOFTIN SUNDAY

Claude Alexander Loftin, 66, native Texan, died at 9:30 a. m. Saturday, August 9th, 1941, at his home in Cameron.

Mr. Loftin had been in critical health for several months and had been seriously ill for four weeks. On Thursday his condition became so critical little hope was held for his recovery.

He was a native of Reynolds County, Texas, and was born in 1875. In the year 1898, he was married to Miss Lillie Cross at Corinth in Milam county. They resided in Milam county all their lives.

Mr. Loftin is survived by his widow, Mrs. Lillie Loftin and seven children as follows: Theo. Loftin of Cameron; Cecil Loftin of Rockdale; Claude Loftin of New Braunfels; Billy Loftin of Houston; Mrs. Johnnie Bunt of Houston and Mrs. Ben Kennon of Cameron.

Eight grand children survive as well as two brothers, Wiley Loftin of Buckholts; Joe Kennedy and one sister Mrs. J. B. West of Rule, Texas.

Funeral services will be held Sunday afternoon at 2:30 o'clock at Walkers Creek Church with Rev. T. D. McCrary, Pastor of the Buckholts Methodist Church, officiating. Interment will be made in the Walkers Creek Cemetery with the Coleman Funeral Home directing arrangements.

## Change the Winter To Suit You

help yourself to new-type heaters, to keep the whole house warm!

"The gas industry sees to it that the gas equipment for the home is just as modern as that for the factory. Since this is a natural gas town from away back, the operating cost is surprisingly low."

Thousands in this section are heading for an easy, healthful winter by bringing their heating facilities up to date. Besides giving a widespread, healthful warmth, modern equipment looks better as well as serves you more efficiently.

Heating your home is important,

especially so since many winter illnesses are directly traceable to catching cold due to inadequate heating facilities in the home during the winter season. Bring your household up to date for the 1941-1942 winter season with modern gas heating and settle down to enjoy an easy, healthful winter.

Mr. and Mrs. Wallace have just this week announced their marriage which took place in Richmond on February 11th. Mrs. Wallace is the former Miss Lucy Turner, daughter of Mr. and Mrs. W. L. Turner of Houston, formerly of Cameron.

Announcement of the marriage was made at a luncheon given by Miss Norma Jean McElwrath, at the home of her parents, Mr. and Mrs. Dewey McElwrath on Sunday.

They have the best wishes of a host of friends who wish for them a future of happiness.

Mrs. Wallace, mother of Mr. Wallace, spent several days of last week in Houston.

Mr. and Mrs. Hugo McCawley of Rockdale visited Mrs. Rose Curlee on Sunday.

Mrs. Robert Isaacs of Georgetown and daughter, Mrs. R. B. Swain of Cotton Valley, La., were guests in the J. C. Wallace home on Sunday afternoon.

Mr. and Mrs. Bentley Fletcher visited her parents, Mr. and Mrs. Ernest Karisch at Winchester on Sunday.

Hugo Glass of Rosebud spent Sunday afternoon in the T. Y. McCormick home.

### CHRISTIAN SCIENCE SERVICES

"Soul" is the subject of the Lesson-Sermon which will be read in all Churches of Christ, Scientist, on Sunday, August 17.

The Bolden Text is: "Bless the Lord, O my soul: and all that is within me, bless his holy name." (Psalms 103:1.)

Among the citations which comprise the Lesson-Sermon is the following from the Bible. "O ye hypocrites, ye can discern the face of the sky; but ye not discern the signs of the times?" (Matthew 16:3.)

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "How much more should we seek to apprehend the spiritual ideas of God, than to dwell on the objects of sense!" (page 510.)

### ON VACATION

Rev. and Mrs. O. C. Acree and children will spend their two weeks vacation at Kerrville. There will be no preaching services on Sunday, August 10 and 17 at the First Presbyterian Church in Cameron.

Regular Sunday School services will be held during the pastor's absence.

Rev. Acree will be back in the pulpit on August 24th.

Mrs. Carol Green and baby are visiting her parents at Teague this week. Mrs. Green recently enjoyed a visit from three of her college girl friends.

### BABY GIRL IS BORN

Mr. and Mrs. Frank Slavik are the proud parents of a baby girl. She was born at 8 a. m. Friday at Cameron Hospital and has been named Lydia after her grand mother.

Mr. Slavik is a candidate for the Legislature. "I just got to have that office now." Mother and baby are doing well.

Mrs. B. F. Robinson has just returned from a visit to Abilene and her grand daughter, Kay Stall, accompanied her home for the remainder of the summer.

## Civil Service Exms. Authorized Here; Big List of Positions

Cameron has just been authorized to hold civil service examinations, it was announced by Joe G. Matula.

This means that applicants will not have to go to Waco or Austin to participate in any civil service examination.

The following positions are open. Treasury Enforcement Agent, Supt. of Building Maintenance, Housing Management Supervisor, Project Auditor, Industrial Specialist, Inspector of Boilers and Halls, Engineering Aide, Senior Cook, Junior Medical Officers, Medical Guard Attendants, Dental Hygienist, Three Classes of Nurses, Junior Veterinarian, Poultry Coordinator, 4 Classes of Blueprint and Photostat Operators.

These are all new positions in addition to those announced from time to time dealing with the Defense Program.

There still is a shortage of Steno-

graphers and Typists and the Examinations are being held every week.

All Naval Air Stations and Navy Yards are short of men in the skilled class and Training Shops such as Duncan Field and various places are asking for men to enter for training with as little as six months experience.

### RETURN FROM CALIFORNIA

Mrs. R. G. McLeod and son Raymond, returned Wednesday from a trip to the West Coast. In California they visited Los Angeles, Longbeach and Hollywood. By steamer they went to Catalina Island.

It was their first trip to California and a grand time is reported.

Mrs. Beatrice Dorrougherty who has been seriously ill for some time, is reported to be resting some better.

Paul Watson and family of Taylor are sending a few days in the home of his parents, Mr. and Mrs. John Watson.
